

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

Introduction	11
Agricultural imports, by countries	11
Summary statement, by countries, of total agricultural imports	13
Agricultural imports, by continents	14
Agricultural imports, by principal articles:	
Sugar	16
Hides and skins	16
Coffee	16
Silk	17
Vegetable fibers	17
Wools	17
Fruits and nuts	17
Tobacco	17
Tea	18
Wines	18
Vegetable oils	18
Cocoa	18
Sources of agricultural imports, in detail	18
Value of agricultural imports:	
Animal matter	19
Cattle	19
Horses	19
Sheep	19
Animals not elsewhere specified, including fowls	20
Live animals (total)	20
Beeswax	21
Bones, hoofs, and horns	22
Crude bristles	22
Bristles, sorted, bunched, or prepared	23
Butter	23
Cheese	23
Milk	24
Eggs	24
Egg yolks	24
Crude feathers and downs	25
Silk cocoons	25
Silk, raw, or as reeled from the cocoon	25
Silk waste	26
Silk (total)	26
Wools, class 1, clothing	26
Wools, class 2, combing	27
Wools, class 3, carpet	27

Value of agricultural imports—Continued.

Animal matter—Continued.

Wools (total)	28
Gelatin	28
Glue	29
Grease	29
Gut	29
Hair	30
Hide cuttings and other glue stock	30
Goatskins	31
Hides of cattle	32
Hides and skins, other than furs, not elsewhere specified	33
Hides and skins, other than furs (total)	34
Honey	35
Meat and meat extracts	35
Bologna sausage	36
Sausage casings	36
Meat products not elsewhere specified	36
Animal oils not elsewhere specified, except whale and fish	37
Rennets	37
Stearin	37
Vegetable matter	38
Argols, or wine lees	38
Barley	38
Corn (maize)	38
Oats	38
Oatmeal	39
Rye	39
Wheat	39
Wheat flour	39
Breadstuffs, and preparations of, not elsewhere specified, used as food	40
Broom corn	40
Chocolate, other than confectionery and sweetened chocolate	40
Cider	41
Cocoa, crude, and leaves and shells of	41
Cocoa, prepared or manufactured	42
Cocoa (total)	42
Coffee	43
Chicory root, raw, unground	43
Chicory root, roasted, ground, or otherwise prepared	44
Coffee substitutes, other than chicory root	44
Curry and curry powder	44
Cotton	44
Flax	45
Hemp	45
Istle, or Tampico fiber	45
Jute and jute butts	45
Manila hemp	46
Sisal grass	46
Vegetable fibers not elsewhere specified	46
Vegetable fibers (total)	47
Natural flowers, preserved or fresh	47
Prune juice or prune wine	48
Fruit juices not elsewhere specified, including cherry juice	48

SOURCES OF THE AGRICULTURAL IMPORTS OF THE UNITED STATES, 1896-1900.

INTRODUCTION.

The present bulletin has been prepared for the purpose of bringing down to date the statistics published two years ago in a similar report¹ covering the five-year period 1894-1898.

AGRICULTURAL IMPORTS, BY COUNTRIES.

Among the countries from which the United States purchased agricultural products during 1900, Brazil, the leading source of our coffee supply, stood foremost. Our agricultural imports from Brazil, amounting in value to \$39,287,000, were considerably smaller, however, than in previous years. In 1896, five years ago, importations to the value of \$60,668,000 were received from that country, but since then each annual record has shown a decreasing trade, the figures just quoted for 1900 being the lowest of the past decade.

The United Kingdom ranked next to Brazil as a factor in our agricultural import trade during 1900, the farm produce purchased from that source having a value of \$32,606,000. While these figures show a considerable increase over the imports for 1898 and 1899, they indicate a smaller trade than that enjoyed in 1896 and 1897. The value reported for 1896 was \$35,420,000, and that for 1897, \$49,783,000. Much of the agricultural produce imported from the United Kingdom had its origin in other countries, and especially in the British dependencies, the shipments from the mother country being largely in the nature of reexports.

Agricultural products valued at \$27,500,000 were purchased from the Dutch East Indies during 1900, those islands ranking third among the sources of supply. In the case of the Dutch East Indies there was a marked growth of trade, the import value just quoted for 1900 being nearly double that for 1896, which was recorded at \$14,598,000.

Cuba stood fourth as a contributor to our agricultural import trade in 1900, the produce received from that island amounting in value to \$27,226,000. During the past five years, as was natural under the

¹ Bulletin No. 17, "Sources of the Agricultural Imports of the United States, 1894-1898."

prevailing conditions, our Cuban imports suffered marked fluctuations, the value dropping from \$36,386,000 in 1896 to \$13,158,000 in 1898, and then partly recovering, as indicated by the figures for 1900.

Germany was the fifth country in importance, supplying agricultural imports that had a value of \$26,049,000. These figures were the largest of the past five years, excepting the record for 1897, which amounted to \$41,358,000. In comparison with the figures for 1896, recorded at \$22,523,000, they show a considerable increase.

Our agricultural imports from Japan increased quite noticeably during the last few years, advancing from \$18,382,000 in 1896 to \$24,767,000 in 1900. The value for the latter year was the highest ever recorded, and made that country sixth in rank among the sources of our agricultural import trade.

The Chinese Empire stood seventh in this regard. Our agricultural imports from China almost kept pace with those from Japan, the value returned for 1900 being \$24,131,000, as compared with only \$18,649,000 for 1896.

From France we purchased farm produce worth \$21,052,000 in 1900, that country ranking eighth in importance. The figures for 1900 were the largest of the period under consideration, although nearly equaled in 1897. Compared with the record for 1896, which amounted to \$17,758,000, they exhibit a noticeable gain.

Unusually large shipments of agricultural produce were received from Hawaii during 1900, the value amounting to \$20,638,000, which was decidedly in excess of any previous record. Our agricultural imports from the islands during 1896 were valued at only \$11,710,000. In 1900 Hawaii stood ninth among the sources of supply.

Italy furnished agricultural produce to the value of \$20,529,000 in 1900, ranking tenth in importance. There was a considerable gain also in the imports from this country, the value for 1896 amounting to only \$15,958,000. The imports from Italy during 1900, like those from Hawaii, were in excess of any previously reported.

Another country from which the United States received agricultural imports worth over \$20,000,000 in 1900 was Mexico, which furnished us with farm produce to the value of \$20,002,000. The importations from Mexico increased rapidly during the five years, the record for 1896 being only \$12,751,000.

After the eleven sources just enumerated the largest import records of 1900 were made in our trade with the British East Indies and the British West Indies. The past five years have witnessed a considerable growth in the amount of agricultural produce received from each of these sources, the importations from the British East Indies increasing in value from \$9,029,000 in 1896 to \$19,581,000 in 1900, and those from the British West Indies showing an advance during the same period from \$8,891,000 to \$10,507,000.

Other sources from which we received agricultural imports exceed-

ing \$5,000,000 in value during 1900 were Canada, Egypt, the Netherlands, Argentina, the Philippine Islands, and Venezuela.

SUMMARY STATEMENT, BY COUNTRIES, OF TOTAL AGRICULTURAL IMPORTS.

In the following summary statement official¹ statistics are presented as to the value of the agricultural products imported into the United States from the various countries of supply during each year from 1896 to 1900, inclusive:

Value of the agricultural products imported into the United States from the several countries of shipment during each fiscal year from 1896 to 1900, inclusive.

Countries from which imported.	Years ended June 30—					Annual average, 1896-1900.

AGRICULTURAL IMPORTS, BY CONTINENTS.

The statistics presented in the following table show the value of the agricultural produce imported into the United States from the several continents during each of the five years 1896-1900:

Value of the agricultural products imported into the United States from the several continents during each fiscal year from 1896 to 1900, inclusive.

Continents from which imported.	Years ended June 30—					Annual average, 1896-1900.	
	1896.	1897.	1898.	1899.	1900.		
	Dollars.	Dollars.	Dollars.	Dollars.	Dollars.	Dollars.	Per ct.
Europe	115,781,686	152,479,699	87,372,948	106,563,691	128,987,262	118,237,057	31.42
South America	92,743,457	90,883,761	71,616,117	64,588,381	65,846,827	77,135,709	20.49
Asia	65,634,195	61,052,008	67,434,863	75,173,211	100,518,759	73,962,607	19.65

Total	391,029,407	400,871,468	314,291,796	355,514,881	420,139,288	376,369,368	100.00

From the above table it will be seen that Europe was decidedly the most important source of our agricultural imports for 1900, the farm produce received from that continent amounting in value to \$129,000,000. With the exception of 1897, when the various countries of Europe sent us agricultural products worth \$152,000,000, the figures for 1900 were the largest in recent years. Compared with the value for 1896, amounting to \$116,000,000, they show a decided increase.

Next to Europe, Asia was the continent that contributed most to our agricultural import trade for 1900. The importations from that source have grown with great rapidity during the past five years, advancing in value from \$66,000,000 in 1896 to \$101,000,000 in 1900. The growth was particularly marked in the last-mentioned year, during which a gain of about \$25,000,000 occurred.

A marked increase also took place in our agricultural imports from Oceania during the period under consideration, the year 1900 showing a record of \$31,000,000, as compared with only \$22,000,000 for 1896.

Our imports of farm produce from North American countries in 1900 were valued at \$83,000,000. While these figures show a gain over the records of the three years immediately preceding, they are somewhat less than the value reported for 1896, which amounted to \$85,000,000.

The principal falling off in our agricultural imports from the several continents occurred in the trade with South America, the record for 1900 being only \$66,000,000, as against \$93,000,000 for 1896. Excepting the year 1899, when the value fell to \$64,600,000, the figures for 1900 were the lowest of the five-year period.

Our agricultural imports from Africa during the years 1896-1900 were decidedly smaller than from any other continent. They declined from \$10,400,000 in 1896 to \$6,700,000 in 1898, but advanced again during 1899 and 1900, reaching \$10,600,000 in the latter year.

AGRICULTURAL IMPORTS, BY PRINCIPAL ARTICLES.

Among our agricultural imports for 1900 there were twelve items with values exceeding \$5,000,000, as follows: Sugar, hides and skins, coffee, silk, vegetable fibers, wools, fruits and nuts, tobacco, tea, wines, vegetable oils, and cocoa.

Following is a table that shows the value of these leading items for each of the five years 1896-1900:

Value of the agricultural imports of the United States, by principal articles and groups, during each fiscal year from 1896 to 1900, inclusive.

Agricultural imports.	Years ended June 30—					Annual average, 1896-1900.

SUGAR.

The Dutch East Indies, Hawaii, Cuba, and Germany were the sources from which the United States procured most of the sugar imported during 1900. Our purchases from the Dutch East Indies were exceptionally large, amounting to \$24,170,000. Hawaii furnished \$20,392,000 worth, Cuba \$18,244,000 worth, and Germany \$12,347,000 worth. After these four leading sources, our largest importations came from the British West Indies, British Guiana, Santo Domingo, and Porto Rico. The consignments received from the British West Indies were valued at \$4,603,000, and those from British Guiana at \$3,779,000. Santo Domingo supplied \$3,365,000 worth, and Porto Rico \$2,450,000 worth. Austria-Hungary, Egypt, Brazil, and Peru were the only other countries contributing imports valued above \$1,000,000.

HIDES AND SKINS.

Our largest imports of hides and skins during 1900 came from the British East Indies, the United Kingdom, France, Germany, and Argentina. The British East Indies furnished unusually heavy shipments in that year, the value amounting to \$10,731,000. From the United Kingdom, which ranked second as a source of supply, we received imports worth \$7,253,000. France sent consignments worth \$5,380,000. From Germany we imported to the value of \$4,714,000 and from Argentina to the value of \$4,236,000. Other countries from which we received shipments of considerable importance were European Russia, Brazil, Mexico, and China. The importations from European Russia were valued at \$2,616,000, those from Brazil at \$2,507,000, and those from Mexico at \$2,380,000. Our purchases from the Chinese Empire were much larger than in previous years, having a value of \$2,137,000. The only additional sources from which we received imports worth above \$1,000,000 were Venezuela, Canada, Uruguay, and Aden.

COFFEE.

Our supply of coffee is derived chiefly from Brazil. The importations from that country during 1900 amounted in value to \$33,905,000. Aside from Brazil, the principal sources were Venezuela, Mexico, the Dutch East Indies, Guatemala, Costa Rica, and Colombia. Venezuela furnished consignments to the value of \$3,533,000, and Mexico to the value of \$3,313,000. From the Dutch East Indies we purchased \$2,936,000 worth, and from Guatemala \$2,089,000 worth. The imports from Costa Rica were valued at \$1,478,000, and those from Colombia at \$1,398,000. After the several countries mentioned, our largest importations in 1900 came from Salvador, that country sending shipments worth \$570,000.

SILK.

Japan, China, and Italy supplied most of the silk used in the United States. Our imports from Japan during 1900 were valued at \$19,715,000, and those from China at \$12,367,000. Italy's consignments for that year had a value of \$10,817,000. The only other country of much importance in this trade was France, from which source we received imports worth \$2,088,000.

VEGETABLE FIBERS.

Mexico was the most important source of the vegetable fibers imported into the United States in 1900, the value of the shipments received from that country being \$12,113,000. Other leading sources were Egypt, the Philippine Islands, the United Kingdom, and the British East Indies. From Egypt we imported to the value of \$6,157,000, and from the Philippine Islands to the value of \$5,019,000. The United Kingdom furnished consignments worth \$4,947,000, and the British East Indies consignments worth \$3,481,000.

WOOLS.

A considerable portion of the wool imported by the United States during 1900 was purchased in the British markets, our importations from the United Kingdom having a value of \$7,688,000. British Australasia, from which we received consignments worth \$2,968,000, was second in importance among the sources of supply. Argentina ranked third in this regard, sending shipments to the value of \$2,675,000. From China we imported \$2,157,000 worth, and from European Russia \$1,680,000 worth. After these countries our largest imports came from Asiatic Turkey, the value being \$620,000.

FRUITS AND NUTS.

Our imports of fruits and nuts during 1900 were received chiefly from Italy, the British West Indies, Spain, Costa Rica, Colombia, and France. Italy, the principal source of supply, contributed shipments worth \$4,540,000. From the British West Indies we imported to the value of \$3,330,000, and from Spain to the value of \$2,053,000. Our purchases from Costa Rica amounted to \$1,318,000, those from Colombia to \$1,251,000, and those from France to \$1,236,000. After the countries mentioned, Greece sent the largest shipments, the value being \$967,000.

TOBACCO.

Over one-half of our tobacco imports for 1900 came from Cuba, the shipments furnished by that island having a value of \$7,616,000.

Next to Cuba, the Netherlands formed the principal source of supply, our purchases in the markets of that country amounting to \$4,569,000. The imports from other countries were comparatively small, those received from Canada, with a value of \$293,000, being the most important.

TEA.

China and Japan furnished most of the tea imported into the United States during 1900. The consignments received from China were valued at \$4,873,000, and those from Japan at \$4,372,000. After the two principal sources mentioned, our largest imports came from the British East Indies, which sent shipments worth \$549,000.

WINES.

A large part of the wines imported in 1900 came from France, that country supplying shipments to the value of \$4,845,000. From Germany, which ranked second as a source of supply, we imported \$1,179,000 worth. Spain sent the next largest shipments, our imports from that country having a value of \$539,000.

VEGETABLE OILS.

Our imports of vegetable oils during 1900 had their origin chiefly in the United Kingdom, France, Italy, and the British East Indies. From the United Kingdom we imported \$1,299,000 worth, and from France \$1,235,000 worth. The shipments received from Italy were valued at \$1,147,000, and those from the British East Indies at \$1,065,000. After these countries, Germany was the principal source of our imports, furnishing consignments worth \$403,000.

COCOA.

The cocoa used in the United States is supplied principally by the British West Indies, Dutch Guiana, Ecuador, and Brazil. During 1900 our imports from the British West Indies amounted in value to \$1,575,000. Dutch Guiana furnished \$818,000 worth, Ecuador \$771,000 worth, and Brazil \$707,000 worth. Of the remaining sources of supply, Portugal was the most important, furnishing shipments to the value of \$540,000.

SOURCES OF AGRICULTURAL IMPORTS, IN DETAIL.

The tables presented on the following pages embrace all the agricultural imports of the United States during the five fiscal years 1896-1900, exhibiting for each article the extent of the annual importations received from the various sources of supply. For convenience in classification, the articles are divided into two groups, consisting,

respectively, of animal matter and vegetable matter. The tables are arranged in two series, the first relating to the values and the second to the quantities of the articles imported. To facilitate comparison, cross references are given from each table of values to the corresponding table of quantities, and vice versa. In some cases, however, values only are given, no returns being made as to quantity. An index to the articles covered by the tables is printed on pages 119-120. The tables are as follows:

Value of the agricultural imports of the United States (animal matter), by articles and countries, during the five fiscal years 1896-1900.

BULLETIN No. 25.

U. S. DEPARTMENT OF AGRICULTURE.
SECTION OF FOREIGN MARKETS.

DISTRIBUTION
OF THE
AGRICULTURAL EXPORTS OF THE
UNITED STATES,

1896-1900.

BY

FRANK H. HITCHCOCK

Chief, Section of Foreign Markets.

WASHINGTON:
GOVERNMENT PRINTING OFFICE.
1901.

LETTER OF TRANSMITTAL.

U. S. DEPARTMENT OF AGRICULTURE,
SECTION OF FOREIGN MARKETS,
Washington, D. C., May 25, 1901.

SIR: I have the honor to transmit herewith a statistical report showing the distribution of the agricultural exports of the United States during the five fiscal years 1896-1900, and to recommend its publication as Bulletin No. 25 of this Office.

Very respectfully,

FRANK H. HITCHCOCK, *Chief.*

Hon. JAMES WILSON,
Secretary of Agriculture.

CONTENTS.

	Page.
Introduction	11
Agricultural exports, by countries	11
Summary statement, by countries, of total agricultural exports	18
Agricultural exports, by continents	15
Agricultural exports, by principal groups:	
Breadstuffs	16
Cotton	17
Meat products	17
Live animals	17
Tobacco	17
Oil cake and oil-cake meal	18
Vegetable oils	18
Fruits and nuts	18
Dairy products	18
Seeds	18
Distribution of agricultural exports, in detail	19
Value of agricultural exports:	
Animal matter	19
Cattle	19
Hogs	20
Horses	20
Mules	21
Sheep	21
Animals not elsewhere specified, including fowls	22
Live animals (total)	23
Beeswax	23
Bones, hoofs, horns, and horn tips, strips, and waste	24
Bristles	25
Butter	25
Cheese	26
Milk	27
Dairy products (total)	28
Eggs	29
Egg yolks	29
Feathers	30
Fertilizer (refuse skins)	30
Glue	30
Grease, grease scraps, and other soap stock	31
Hair (including manufactures of)	32
Hides and skins, other than furs	32
Honey	33
Canned beef	34
Fresh beef	35
Beef, salted or pickled	35

Value of agricultural exports—Continued.

Page.

Animal matter—Continued.

Beef, cured, not elsewhere specified	36
Tallow	37
Bacon	38
Hams	39
Canned pork	40
Fresh pork	41
Pork, salted or pickled	41
Lard	42
Mutton	43
Oleo oil	44
Oleomargarin (imitation butter)	44
Poultry and game	45
Sausage casings	46
Canned meats not elsewhere specified	47
Meat products not elsewhere specified	48
Meat products (total)	49
Lard oil	50
Animal oils not elsewhere specified, except whale and fish	51
Quills	51
Prepared rennets	52
Silk noils	52
Silk waste	52
Silkworm eggs	52
Stearin	52
Wool	53

Vegetable matter	53
Barley	53
Bran, middlings, and mill feed	54
Bread and biscuit	54
Buckwheat	55
Corn (maize)	56
Corn meal	56
Oats	57
Oatmeal	58
Rye	59
Rye flour	59
Wheat	60
Wheat flour	60
Breadstuffs, preparations of, for table food	62
Breadstuffs not elsewhere specified	63
Breadstuffs (total)	64
Broom corn	65
Broom root (rice root)	65
Cider	65
Coffee and cocoa, ground or prepared, and chocolate	66
Compressed food	67
Sea-island cotton, in bales	67
Cotton, upland, etc., in bales	67
Waste cotton	68
Cotton (total)	68
Cut flowers	69
Dried apples	69

DISTRIBUTION OF THE AGRICULTURAL EXPORTS OF THE UNITED STATES, 1896-1900.

INTRODUCTION.

The object of the present bulletin is to continue and bring down to date the statistics published two years ago in a similar report¹ covering the five-year period 1894-1898.

AGRICULTURAL EXPORTS, BY COUNTRIES.

There were a dozen countries in 1900 to each of which the United States exported over \$10,000,000 worth of domestic farm produce. Chief among these countries were the United Kingdom and Germany, the former purchasing to the value of \$408,000,000 and the latter to the value of \$134,000,000.

Our agricultural exports to the United Kingdom were the largest on record, excepting those of the extraordinary year 1898, when a value of \$439,000,000 was attained. In our trade with Germany the exports for 1900 were decidedly in excess of any previously reported. Compared with the shipments for 1896, five years ago, which were valued at less than \$72,000,000, they show an increase of nearly 100 per cent.

After the United Kingdom and Germany, the principal foreign market for American farm produce in 1900 was that afforded by the Netherlands, to which country exports valued at \$52,000,000 were sent. These figures were exceeded only in 1899, and then by less than \$1,000,000. As contrasted with the record for 1896, amounting to \$21,000,000, they exhibit a striking gain.

France ranked fourth in importance, and Belgium fifth, among our foreign markets in 1900, the former country receiving agricultural exports to the value of \$45,000,000 and the latter to the value of \$33,000,000. In comparison with the trade of 1896 our exportations to each of these destinations displayed an important growth, the shipments to France during that year having a value of only \$31,000,000 and those to Belgium a value of little more than \$18,000,000. Our exports, both to France and to Belgium, however, attained a higher

¹ Bulletin No. 16, "Distribution of the Agricultural Exports of the United States, 1894-1898."

value in 1898 than in either of the succeeding years, the record for the former country being \$75,000,000 and that for the latter \$37,000,000.

Italy was the sixth country in rank, the products of United States agriculture marketed there during 1900 having a value of \$24,000,000. Each of the past four years has witnessed a considerable gain in our exports to that country. In 1896 they were valued at less than \$15,000,000.

After these six European countries Canada was our principal customer, purchasing to the extent of \$21,000,000. The agricultural exports to Canada advanced in value from \$20,000,000 during 1896 to \$32,000,000 in 1898, and then declined to the figures just quoted for 1900.

Japan furnished a market in 1900 for over \$15,000,000 worth of American farm produce. The exports to that country afford one of the most interesting examples of growth in our recent export trade. During 1896 the shipments barely exceeded \$2,000,000 in value. Subsequent years have shown in every instance a decided gain.

Agricultural exports worth nearly \$15,000,000 were also marketed in Denmark during 1900, that country furnishing another striking instance of trade development. In 1896 the exports to Denmark were valued at about \$5,000,000, or little more than a third of the value recorded for 1900.

Cuba was the tenth in importance among the destinations under consideration. The amount of United States farm produce sent to that island has greatly increased during the past five years. In 1896 the exports were at low ebb, having a value of less than \$4,000,000. Since then important gains have been made each year, culminating in a value of about \$14,000,000 for 1900.

Products of American agriculture were marketed in Spain during 1900 to the value of \$10,500,000, these figures showing a slight increase over the exports for 1896, which amounted to a trifle less than \$10,000,000. In the three years following 1896 a considerable decline occurred, but the lost trade was more than recovered during 1900.

Another country that in 1900 purchased over \$10,000,000 worth of American farm products was British Africa, the exports to that destination having a value of \$10,300,000, or nearly double the value reported in 1896, which was only \$5,300,000. Although there was a continuous increase throughout the five-year period 1896-1900, the largest gain took place in the last of these years.

After the twelve leading countries mentioned, the most important destinations in our agricultural export trade for 1900, with the value recorded in each case, were: Sweden and Norway, \$5,515,000; Hong-kong, \$5,404,000; the British West Indies, \$5,224,000; Portugal, \$4,905,000; Mexico, \$4,572,000; Brazil, \$4,393,000; Austria-Hungary, \$3,508,000; European Russia, \$3,215,000; Hawaii, \$2,846,000; Porto

Rico, \$2,311,000; British Australasia, \$2,086,000; and the Philippine Islands, \$1,657,000.

Our total exports of domestic farm produce to Cuba, Porto Rico, Hawaii, and the Philippine Islands in 1900 had an aggregate value of over \$20,000,000 as compared with only \$6,269,000 in 1896. The gain in these exports during the past five years exceeded 200 per cent.

Other destinations to which the United States sent agricultural exports in 1900, having a value in excess of \$1,000,000, were British Guiana, Haiti, Venezuela, the French West Indies, Newfoundland and Labrador, and the Chinese Empire.

SUMMARY STATEMENT, BY COUNTRIES, OF TOTAL AGRICULTURAL EXPORTS.

In the following summary statement official¹ statistics are presented as to the value of the agricultural products exported from the United States to the various countries of destination during each year from 1896 to 1900, inclusive:

Value of the agricultural products exported from the United States to the several foreign countries during each fiscal year from 1896 to 1900, inclusive.

Total	574,398,264	699,755,193	859,918,946	792,811,738	844,616,580	752,120,138	100.00

From the statistics given above it appears that South America was the only continent to which our agricultural exports for the past five years show a decline. The shipments to South American countries during 1900 had a value of only \$9,452,000, as against \$11,236,000 in 1896.

The most striking gain disclosed by the figures of 1896-1900 was that exhibited in our exports to Asia. The value of the agricultural produce sent to Asiatic countries rose from \$5,735,000 in 1896 to nearly \$23,000,000 in 1900, the latter amount far exceeding any previous record. Since 1896 the exports have advanced almost fourfold in value. The increase of 1900 over 1899 was particularly marked, amounting to more than \$6,000,000.

There was also an interesting gain in our agricultural export trade with Oceania, our shipments to the various islands comprised under that term amounting in 1900 to \$6,799,000, as compared with only \$3,986,000 in 1896. The figures returned for 1900 were the highest ever recorded.

The principal part of our agricultural exports during 1900, as in previous years, found a market in Europe. Our sales to European countries for that year had an aggregate value of \$739,000,000. With the exception of the phenomenal year 1898, when our agricultural exports to Europe reached a value of \$762,000,000, these figures are the largest on record. Compared with the value for 1896, amounting to \$503,000,000, they show an enormous gain.

To the various countries of North America the United States exported agricultural products in 1900 having a value of \$55,000,000, or considerably less than the record for 1899, which amounted to \$58,000,000. The exports distributed among North American countries rose in value from \$44,000,000 in 1896 to the figures just quoted for 1899, and then fell off, as described, in 1900.

16 DISTRIBUTION OF AGRICULTURAL EXPORTS, 1898-1900.

Our agricultural exports to Africa, like those to Asia and to Oceania, reached in 1900 the highest value ever recorded. The shipments to African countries in that year were valued at \$11,496,000, or slightly more than double the value for 1896, which amounted to only \$5,735,000.

AGRICULTURAL EXPORTS, BY PRINCIPAL GROUPS.

The ten principal items in our agricultural export trade for 1900, named in the order of their value, were as follows: Breadstuffs, cotton, meat products, live animals, tobacco, oil cake and oil-cake meal, vegetable oils, fruits and nuts, dairy products, and seeds.

In the following table statistics are presented to show the value of these leading items for each of the five years 1896-1900:

Value of the agricultural exports of the United States, by leading groups, during each fiscal year from 1896 to 1900, inclusive.

Agricultural ex- ports.	Years ended June 30—					Annual average, 1896-1900.

BREADSTUFFS.

About one-half of our entire export trade in breadstuffs during 1900 was carried on with the United Kingdom, the shipments to that country having a total value of \$135,375,000. Next to the United Kingdom, Germany was our largest customer, receiving consignments to the value of \$32,129,000. To the Netherlands we sent exports worth \$25,275,000, to Belgium \$14,135,000, and to Denmark \$8,599,000. Canada was another important purchaser, buying to the extent of \$7,421,000. France took \$4,380,000 worth, Hongkong \$4,227,000 worth, and Portugal \$4,133,000 worth. British Africa purchased to the extent of \$3,190,000, and the British West Indies to the extent of \$3,117,000. Cuba also furnished a market of considerable importance, taking shipments worth \$2,915,000. Our exports to Brazil, although much smaller than in previous years, had a value of \$2,595,000. The only other destinations to which we sent exports of this kind worth over \$1,000,000 in 1900 were Japan, Sweden and Norway, Hawaii, and Porto Rico.

COTTON.

Of the raw cotton exported from the United States during 1900, \$90,260,000 worth found a market in the United Kingdom, \$64,395,000 worth in Germany, and \$27,776,000 worth in France. Large shipments were also made to Italy, the exports to that country having a value of \$17,463,000. After the four European countries mentioned, Japan was the most important customer, receiving consignments to the value of \$12,713,000. Spain made purchases worth \$9,621,000, and Belgium purchases worth \$5,732,000. To Canada there were exports valued at \$4,236,000, to the Netherlands \$2,845,000, and to European Russia \$2,258,000. Austria-Hungary and Denmark were the only other destinations to which exports valued above \$1,000,000 were sent, the consignments to the former country having a value of \$1,759,000, while those to Denmark were valued at \$1,251,000.

MEAT PRODUCTS.

The United Kingdom is decidedly the heaviest purchaser of American meat products. Our exports to the British market in 1900 were exceptionally large, having a total value of \$107,621,000. Aside from the United Kingdom, Germany and the Netherlands were the leading foreign buyers, the former country receiving consignments worth \$20,195,000 and the latter consignments worth \$13,496,000. Belgium ranked fourth among the countries of destination, taking shipments to the value of \$5,562,000. Cuba followed in importance, the exports to that island having a value of \$4,664,000. France made purchases worth \$3,776,000, and Sweden and Norway purchases worth \$3,154,000. Other countries to which we sent exports exceeding \$1,000,000 in value were British Africa, Denmark, Canada, Italy, the British West Indies, and Brazil.

LIVE ANIMALS.

The live animals exported from the United States go chiefly to the United Kingdom. In 1900 that country was the destination of exports worth \$32,708,000. Our next largest shipments for the year mentioned went to British Africa, where consignments to the value of \$3,761,000 were marketed. Cuba furnished a market for shipments worth \$2,984,000. The only other country to which there were exports worth over \$1,000,000 was Canada, the shipments to that destination having a value of \$1,307,000.

TOBACCO.

The United Kingdom, Germany, Italy, and France were the principal destinations of the tobacco exported from the United States in 1900. Our shipments to the United Kingdom during that year were valued at \$10,962,000. Germany received consignments to the value of \$5,056,000. To Italy we sent exports worth \$3,666,000, and to

France exports worth \$2,999,000. Belgium and the Netherlands also purchased quite heavily, the former country buying to the value of \$1,469,000 and the latter to the value of \$1,381,000. Of the remaining destinations Canada was the most important, taking shipments worth \$960,000.

OIL CAKE AND OIL-CAKE MEAL.

Our exports of oil cake and oil-cake meal in 1900 went chiefly to five European countries—the United Kingdom, Germany, Denmark, the Netherlands, and Belgium. The shipments to the United Kingdom were valued at \$4,319,000 and those to Germany at \$4,009,000. Denmark made purchases worth \$2,654,000 and the Netherlands purchases worth \$2,650,000. The exports to Belgium had a value of \$2,314,000. After these leading destinations France was the largest purchaser, our shipments to that country amounting in value to \$657,000.

VEGETABLE OILS.

France afforded the principal market for our exports of vegetable oils in 1900, the consignments sent to that country having a value of \$4,103,000. The next largest exports were sent to the Netherlands, where shipments worth \$2,987,000 were marketed. Germany made purchases worth \$1,555,000 and Austria-Hungary purchases worth \$1,450,000. To Belgium there were consignments valued at \$1,447,000. Mexico received shipments that were exceptionally large for that country, the value being \$1,072,000. Italy took \$936,000 worth and the United Kingdom \$926,000 worth.

FRUITS AND NUTS.

Our exports of fruits and nuts for 1900 found their principal markets in the United Kingdom, Germany, Canada, and the Netherlands. To the United Kingdom shipments worth \$4,437,000 were sent, and to Germany shipments worth \$2,168,000. Canada made purchases to the value of \$1,350,000 and the Netherlands to the value of \$1,222,000. After these countries Belgium and France were the largest purchasers, the former country taking \$631,000 worth and the latter \$598,000 worth.

DAIRY PRODUCTS.

The United Kingdom received the largest share of the dairy products shipped from the United States in 1900. Our consignments to the British market for that year had a value of \$6,526,000. Aside from the United Kingdom, the most important purchasers were Canada and Cuba, our shipments to the former destination being valued at \$591,000 and those to Cuba at \$530,000. Other markets of considerable importance were found in Brazil, the British West Indies, Hawaii, Japan, and Venezuela.

SEEDS.

Our exports of seeds during 1900 went in largest quantities to the United Kingdom, Germany, Canada, and the Netherlands. The shipments marketed in the United Kingdom were valued at \$2,151,000

and those in Germany at \$1,604,000. Canada made purchases worth \$1,270,000, while the Netherlands bought to the value of \$1,178,000. After these leading destinations our largest customers were France and Belgium, the former country buying to the extent of \$270,000 and the latter to the extent of \$248,000.

DISTRIBUTION OF AGRICULTURAL EXPORTS, IN DETAIL.

The tables presented on the following pages embrace all the agricultural exports of the United States for the fiscal years 1896-1900, showing in the case of each article the extent of the shipments sent to the several countries of destination. For convenience in classification the articles are divided into two groups, consisting, respectively, of animal matter and vegetable matter. The tables are arranged in two series, the first relating to the values and the second to the quantities of the articles exported. To facilitate comparison cross references are given from each table of values to the corresponding table of quantities, and vice versa. In some cases, however, values only are given, no returns being made as to quantity. An index to the articles covered by the tables is printed on pages 179-182. The tables are as follows:

Value of the agricultural exports of the United States (animal matter), by articles and countries, during the five fiscal years 1896-1900.

AGRICULTURAL IMPORTS

OF THE

UNITED KINGDOM,

1896-1900.

BY

FRANK H. HITCHCOCK,

Chief, Section of Foreign Markets.

WASHINGTON:
GOVERNMENT PRINTING OFFICE.
1902.

LETTER OF TRANSMITTAL

U. S. DEPARTMENT OF AGRICULTURE,

SECTION OF FOREIGN MARKETS,

Washington, D. C., November 27, 1901.

SIR: I have the honor to transmit herewith a statistical report on the agricultural imports of the United Kingdom during the five years 1896-1900, and to recommend its publication as Bulletin No. 26 of this Office.

Very respectfully,

FRANK H. HITCHCOCK,
Chief.

Hon. JAMES WILSON,
Secretary of Agriculture.

CONTENTS.

	Page.
Introduction	13
Sources of importation	13
United States	14
Foreign countries:	
France	16
Germany	16
Netherlands	17
Argentina	17
Russia	17
Denmark	17
Egypt	18
Belgium	18
Spain	18
Asiatic Turkey	18
British possessions:	
Australasia	18
British East Indies	19
Canada	19
Cape of Good Hope	19
Summary statement, by countries, of agricultural imports	19
General character of agricultural imports	22
Leading items:	
Breadstuffs	23
Wheat	23
Wheat flour	24
Corn	25
Corn meal	25
Oats	25
Oatmeal	26
Barley	26
Rye	26
Meat products	27
Bacon	27
Hams	28
Lard	28
Pork	28
Fresh beef	29
Preserved beef	29
Tallow	29
Mutton	30
Oleomargarin, or imitation butter	30
Cotton	30
Dairy products	31
Butter	31
Cheese	32
Milk	32
Wool	33
Sugar	34
Fruits and nuts	35
Oranges	36
Apples	36
Grapes	36
Bananas	36
Lemons	36
Currants	36

Leading items—Continued.

	Page.
Fruits and nuts—Continued.	
Raisins	37
Figs	37
Nuts	37
Live animals	37
Cattle	38
Horses	38
Sheep	38
Tea	38
Seeds	39
Flaxseed	39
Cotton seed	40
Rape seed	40
Grass seed	40
Hides and skins	40
Hides	41
Sheepskins	41
Goatskins	41
Rabbit skins	42
Vegetables	42
Potatoes	42
Onions	43
Tomatoes	43
Peas	43
Beans	43
Vetches and lentils	44
Eggs	44
Wines	44
Jute	44
Hemp	45
Tobacco	45
Oil cake	46
Flaxseed oil cake	46
Cotton-seed oil cake	46
Coffee	46
Rice	47
Flax	47
Table of leading agricultural imports	48
Agricultural imports in detail:	
Value	49
Quantity	57
Sources of agricultural imports in detail	64
Value of agricultural imports:	
Animal matter	64
Cattle	64
Horses	65
Sheep	65
Swine	66
Live animals not elsewhere specified	66
Bones for fertilizers	67
Bones (except for fertilizers), including animal charcoal	67
Bristles	68
Butter	68
Cheese	69
Condensed milk	69
Milk, other than condensed	69
Eggs	70
Feathers and downs for beds	70
Feathers and downs for ornament	71
Silk, raw	71
Silk waste	72
Mohair	72
Goats' hair, other than mohair	73
Hair of the alpaca, vicuña, and llama	73
Sheep's wool	73
Wool, etc., not elsewhere specified, including fleeces	74

Value of agricultural imports—Continued.

AGRICULTURAL IMPORTS OF THE UNITED KINGDOM, 1896-1900.^a

INTRODUCTION.

The United Kingdom is the principal market for the surplus agricultural produce of exporting countries. The products of agriculture sent to that market from all sources in 1900 reached the enormous value of \$1,578,000,000, forming 62 per cent of the entire import trade of Great Britain and Ireland.

The total value of the merchandise imported into the United Kingdom during each of the five years 1896-1900, and the extent to which that merchandise consisted of agricultural produce, will be seen from the following table:

Imports of the United Kingdom classified as agricultural and nonagricultural.

Calendar years.	Total imports.	Agricultural.		Nonagricultural.	
	<i>Dollars.</i>	<i>Dollars.</i>	<i>Per cent.</i>	<i>Dollars.</i>	<i>Per cent.</i>
1896.....	2,150,063,081	1,378,983,618	64.13	771,129,413	35.87
1897.....	2,194,932,434	1,393,546,461	63.49	801,385,973	36.51
1898.....	2,289,906,792	1,474,681,428	64.40	815,224,364	35.60
1899.....	2,360,425,665	1,469,921,839	62.27	890,500,826	37.73
1900.....	2,545,545,281	1,577,522,533	61.97	968,022,748	38.03
Annual average, 1896-1900.....	2,308,174,441	1,458,921,776	63.21	849,252,665	36.79

SOURCES OF IMPORTATION.

To this extraordinary import trade in agricultural produce the United States was the principal contributor, furnishing about 33 per cent, or nearly one-third, of the supply. About 43 per cent came from foreign countries other than the United States. The several possessions and dependencies of the United Kingdom throughout the world together contributed about 24 per cent.

^a The statistics given in the present bulletin are based on the official import returns collected by the British customs department. Through the courtesy of Mr. A. J. Wood, the statistician of that department, it has been possible as regards certain articles to print more detailed figures than those published in the department's yearly report, entitled Annual Statement of the Trade of the United Kingdom with Foreign Countries and British Possessions. With the exception of the figures thus furnished by Mr. Wood from the records of his department, the official publication mentioned is the authority for all statistical matter here presented. To serve more satisfactorily the purposes of the bulletin, the British denominations of quantity and value have in every instance been converted into United States equivalents.

UNITED STATES.

The value of the agricultural produce received from the United States amounted to \$513,000,000, leaving over \$1,000,000,000 worth of such produce to be supplied from other sources.

While the United States already possesses a market of exceeding importance in the United Kingdom, selling to that country more than half of the surplus production of American farms, it will be seen from the figures just quoted that the possibilities of further trade extension there, in competition with other exporting countries, are well worth consideration.

Among the agricultural imports into the British market during 1900 there were comparatively few products in which the United States controlled the larger portion of the trade. Taking such items^a as had a value exceeding \$10,000,000, of which there were thirty-four in the year under consideration, we find that only nine of them came more extensively from the United States than from the various other sources. These nine items, with the percentage of the total supply received in each case from the United States, were as follows: Lard, 93 per cent; hams, 89 per cent; tobacco, 84 per cent; wheat flour, 83 per cent; fresh beef, 74 per cent; raw cotton, 74 per cent; cattle, 72 per cent; indian corn, 70 per cent; and bacon, 64 per cent.

It will be noticed that, with the exception of cotton, indian corn, and tobacco, the products enumerated are all articles of food. They occupy a most important place with reference to the bread and meat supply of the British people. While other countries are the chief contributors as regards the various food articles that may be properly designated as luxuries, and especially such articles as can in cases of emergency be readily dispensed with, the United States is the source from which the British people procure in large measure those staple food products that are absolutely necessary to the maintenance of life. It is this staple character of the foods in question that causes the peculiar dependence of the United Kingdom on American sources of supply.

The above-mentioned articles that are so largely furnished by the United States comprised in 1900 nearly three-fourths of all the farm produce imported from that source. The residue of the British agricultural imports for 1900 included several products that were received quite extensively from the United States, but in amounts forming less than 50 per cent of the total, as follows: Wheat, 48 per cent; oil cake, 46 per cent; oats, 28 per cent; barley, 26 per cent; cheese, 25 per cent; and tallow, 25 per cent. Although at present the principal part of the trade in each of these articles goes to competing countries, there is unquestionably abundant opportunity, in the face of this competition, to extend the sale of the American products.

Aside from the various leading items to which reference has already been made, the agricultural imports into the United Kingdom during

^a See table on page 48.

the year in question embraced nineteen additional articles with values exceeding \$10,000,000. In the case of these latter articles, the United States supplied only a small portion of the total importations.

Some of the products in which the American export trade is now comparatively small, as, for instance, butter, eggs, wines, oleomargarin, potatoes, and oranges, seem capable under favorable conditions of being produced in the United States in sufficient quantities to warrant much larger exportations.

Less than 2 per cent of the butter imported into the British market during 1900 was furnished by the United States. For the imports received from other sources the United Kingdom paid over \$83,000,000. These figures suggest large possibilities in the way of extended trade for American butter.

The British market apparently offers the United States abundant opportunity to establish a valuable export business in eggs. The eggs imported by the United Kingdom in 1900 cost over \$26,000,000. Only about 3 per cent of this sum went into the pockets of American exporters.

During 1900 the considerable sum of \$25,000,000 was spent by the British people for imported wines. Less than 1 per cent of these wines came from the United States. With the rapid growth of the California wine industry the outlook for a larger export trade in that product becomes brighter.

About \$12,000,000 worth of oleomargarin was imported during 1900 to supply the needs of the British people. While at present the amount of oleomargarin manufactured in the United States exceeds only slightly the domestic requirements, this article could unquestionably be produced for exportation. Of the British imports for 1900 the United States supplied less than 1 per cent.

During the year under consideration the United Kingdom spent nearly \$11,000,000 for imported potatoes. Practically the entire trade went to countries other than the United States. The British market would seem to afford a promising field for the sale of American potatoes. This apparent opportunity to develop a larger export trade in potatoes suggests also the possibility of creating a foreign demand for that important American product, the yam, or sweet potato.

Oranges form another item among the British agricultural imports that could be more largely supplied from American sources. The remarkable development of orange culture in the United States, especially on the Pacific coast, and the recently improved facilities for transportation across the continent, will doubtless result in bringing the American fruit into more active competition with the product of other countries that now supply the British market. During 1900 the people of the United Kingdom spent over \$10,000,000 in the importation of oranges. Less than 1 per cent of the shipments received came from the United States.

Aside from the products just mentioned, which have been selected as offering some of the most promising opportunities for development in the trade between the United States and the United Kingdom, there are numerous other agricultural products that suggest possibilities in the way of a larger sale in the British market. Many of the articles falling within this class are what are known as perishable merchandise, consisting of products that can not be transported great distances except under refrigeration. The more general introduction of refrigeration facilities on land and sea has greatly increased the opportunities for trade extension in such products, making it possible to forward them in good condition to the seaboard and transport them undamaged across the Atlantic to the British market in competition with similar products that are sent to that market by the less distant countries of Europe. It is in these perishable products, the exportation of which is made possible by modern transportation methods, that the greatest future development of American trade in the British market may be expected.

FOREIGN COUNTRIES.^a

FRANCE.

Chief among the foreign countries that compete with the United States in supplying farm produce to the United Kingdom is the great neighboring republic of France, from which in 1900 agricultural imports were received to the value of \$103,000,000, comprising 6.5 per cent of the total. Large as are the purchases made from France, however, they amount to less than a quarter of what is bought from the United States.

Sugar and wines are the leading articles of importation from France. That country also furnishes large quantities of butter and eggs, as well as fruits and vegetables in abundance. French brandies are imported quite extensively, forming another item of considerable value. Wool is also one of the leading imports from France.

GERMANY.

Next to France, the largest competitor of the United States in the British market is Germany, from which country in 1900 there was

^a Unfortunately the British import returns do not always show the original sources of the articles received, it being the general practice to record imports as coming from the last country of shipment. Under this method the recorded imports from seaboard nations, such as France, Belgium, the Netherlands, and Germany, frequently include merchandise originally shipped from interior countries like Switzerland and Austria-Hungary. In the case of Switzerland, for instance, while products of that country were unquestionably imported into the United Kingdom during the years covered by the report, no such imports appear on the face of the returns. The imports from Switzerland were undoubtedly credited to the intermediate countries through which they passed. The character of the returns in this regard should be taken into consideration in making use of the statistics here presented, and especially with reference to the importations recorded from the several seaboard countries adjacent to the United Kingdom.

imported \$79,000,000 worth of agricultural produce, or 5 per cent of the total. Sugar, which is the principal factor in the German trade, constituted more than half of these imports. Aside from sugar, the agricultural products purchased most extensively from Germany are eggs, wheat, oats, and oil cake. The wheat and oats, if not also the eggs and oil cake, are doubtless in large part reexports of produce received originally from other countries, and particularly from Russia.

NETHERLANDS.

The Netherlands supplied 4.4 per cent of the agricultural produce imported into the United Kingdom during 1900, the value amounting to \$69,000,000. Oleomargarin, or imitation butter, formed the largest item, and sugar the second largest. Among other products that are imported in considerable quantities from the Netherlands should be mentioned butter, cheese, and milk, and also fresh pork and fresh mutton.

ARGENTINA.

Agricultural imports worth \$63,000,000, or 4 per cent of the total, were received in 1900 from Argentina. Wheat is the product imported most extensively from that source. Another grain that the United Kingdom receives in large quantities from Argentina is indian corn, or maize. Recently an extensive trade has been developed in fresh mutton, and also a considerable trade in fresh beef. Argentine cattle and sheep are imported quite largely, and to some extent their products—tallow and wool. Flaxseed is another item of considerable importance among the agricultural imports received from Argentina.

RUSSIA.

During 1900 Russia kept equal pace with Argentina as a contributor to the agricultural import trade of the United Kingdom, furnishing products worth \$63,000,000, or 4 per cent of the total. Grains occupy an important place among the products received from Russia. In the year mentioned oats were imported more extensively than any other variety. Wheat, barley, and indian corn followed in the order named. Flax and flaxseed are also leading imports from Russia, and within the last few years an important trade has been developed in butter and eggs.

DENMARK.

From Denmark, which is the leading source of the United Kingdom's butter imports, agricultural produce was received in 1900 to the value of \$62,000,000, or 3.9 per cent of the total. After butter, the principal item received from Denmark is bacon, to the production of which Danish agriculturists have recently given much attention. In addition to butter and bacon, the Danes are now beginning to send large quantities of eggs to the British market.

EGYPT.

The large amount of cotton supplied by Egypt gives that country a place of some prominence among the sources of the United Kingdom's agricultural imports. In 1900 the agricultural products of all kinds imported from Egypt had an aggregate value of \$60,000,000, forming 3.8 per cent of the total. The long-fibered Egyptian cotton, which is used so extensively by the British in the manufacture of certain lines of cotton goods, comprises by far the largest part of the trade. Of the remaining imports, cotton seed, another product of the cotton plant, is decidedly the most important.

BELGIUM.

Belgium contributed 2.2 per cent of the agricultural produce imported by the United Kingdom during 1900, the shipments for that year having a value of \$34,000,000. Sugar, flax, and eggs are the articles received in largest quantities from Belgium. Other items of considerable importance in the Belgian trade are potatoes, butter, and wool. It is to be assumed that the wool furnished by Belgium was almost entirely the product of other countries, and probably in chief part of France and Argentina.

SPAIN.

From Spain agricultural imports amounting in value to \$26,000,000, and forming 1.7 per cent of the total, were received during 1900. Fruits occupy the most important place among the products purchased from that country. The orange is the fruit imported most extensively, but raisins and grapes are also received in considerable quantities. Next to fruits the principal item consists of wines. Other leading imports from Spain are Spanish onions, esparto, olive oil, and almonds.

ASIATIC TURKEY.

Asiatic Turkey sent to the British market in 1900 \$16,000,000 worth of agricultural produce, or 1 per cent of the total. Barley forms the largest item among the agricultural imports from that country. Other articles of considerable importance are raisins, figs, and wool.

BRITISH POSSESSIONS.

AUSTRALASIA.

Among the British possessions that contribute to the agricultural import trade of the parent country the Australasian colonies now rank foremost. In 1900 Australasia furnished about 9 per cent of all the agricultural produce imported by the United Kingdom, the combined imports from the various Australasian colonies having an aggregate value of \$146,000,000. New Zealand, New South Wales, and Victoria are the leading sources, but Queensland and South Australia also make important contributions. Products of animal industry,

and particularly of sheep raising, are conspicuous among the importations from Australasia. Wool forms decidedly the largest item in the trade, while fresh mutton ranks second in importance. Butter is also imported quite extensively from Australasia, and so are tallow and stearin. Beef, fresh and cured, forms another item of considerable importance.

BRITISH EAST INDIES.

Next to Australasia, the British East Indies supply the greatest amount of agricultural produce imported into the United Kingdom from its several colonial possessions. In 1900 the value of the shipments received from that source amounted to \$126,000,000, forming about 8 per cent of the total. A large part of the imports received from the British East Indies comes from Bengal. After Bengal, the most important sources are Ceylon and Bombay.

The principal import into the United Kingdom from the British East Indies is tea. Jute ranks next to tea in importance, while flaxseed stands third and rice fourth. Hides and skins also form a considerable item among the articles of importation.

CANADA.

With the exception of Australasia and the British East Indies, Canada outstrips all other British possessions as a contributor to the agricultural import trade of the mother country. During 1900 the agricultural products received from Canada comprised 4.4 per cent of the total, their value being \$69,000,000.

Cheese is the item of leading value among the articles supplied by Canada. Other animal products furnished quite extensively are bacon and hams, and butter and eggs. Canadian beef cattle are shipped in large numbers to the United Kingdom, forming one of the principal features of the trade. Canada also sends heavy shipments of grain to the British market, particularly wheat and indian corn, with oats in smaller quantities. Wheat flour is another important article of shipment, as are also fresh apples.

CAPE OF GOOD HOPE.

Of the remaining British dependencies that send agricultural produce to the markets of the United Kingdom, the Cape of Good Hope is the most important. During 1900 about 1 per cent of the British agricultural imports came from that source, the value amounting to \$14,000,000. The principal products received from the Cape are wool, ostrich feathers, and mohair.

SUMMARY STATEMENT, BY COUNTRIES, OF AGRICULTURAL IMPORTS.

Following is a table that shows the value of the agricultural products imported into the United Kingdom from the various countries of supply during each of the five years 1896-1900:

20 AGRICULTURAL IMPORTS OF UNITED KINGDOM, 1896-1900.

22 AGRICULTURAL IMPORTS OF UNITED KINGDOM, 1896-1900.

GENERAL CHARACTER OF AGRICULTURAL IMPORTS.

An examination into the character of the agricultural imports of the United Kingdom for 1900 brings out the fact that about 60 per cent comprised articles of food, about 35 per cent raw materials for manufacture, and about 5 per cent feed stuffs for the maintenance of live stock.

The amount paid by the United Kingdom for imported foods in the year under consideration reached as high as \$937,000,000, or about \$23 per capita. This shows how largely the British people depend on outside sources of supply for their means of sustenance.

The people of the United Kingdom also depend in great measure on foreign sources for the various raw materials that form the basis of their extensive manufacturing industries. During 1900 the imports of such materials of an agricultural nature cost \$523,000,000, or \$13 per capita.

The British are likewise obliged to purchase from other countries a considerable portion of the feed required for their dairy cattle and for the large number of draft animals used throughout the United Kingdom. In the importation of feed stuffs during 1900 the sum of \$102,000,000 was expended.

In addition to the three great classes of imports mentioned—food products, raw materials for manufacture, and feed stuffs—about \$15,000,000 worth of miscellaneous agricultural produce was imported into the British market during 1900.

Of the food products received from abroad in that year the United States supplied about 30 per cent, outlying British possessions about 20 per cent, and foreign countries other than the United States the remaining 50 per cent.

In the case of raw materials the United States was the source of 33 per cent, the British possessions of 35 per cent, and other countries of 32 per cent.

Of the feed stuffs the United States contributed 57 per cent, the British possessions less than 8 per cent, and other sources about 35 per cent.

The following table shows the value of the agricultural imports into the United Kingdom classified as food products, raw materials, and feed stuffs, and the percentage of each class received from the United States, from British possessions, and from other sources:

Value of agricultural food products, raw materials, and feed stuffs imported into the United Kingdom during 1900.

BREADSTUFFS.

Breadstuffs form decidedly the most important item in the British agricultural import trade. During 1900 the amount expended for imported breadstuffs was \$288,000,000, of which sum \$157,000,000, or 55 per cent was paid to the United States. The breadstuffs procured from foreign countries other than the United States cost \$99,000,000, forming 34 per cent of the total, while from British possessions there were purchases amounting to \$32,000,000, or 11 per cent. Wheat and wheat flour, corn, oats, and barley were the principal imports under the head of breadstuffs.

Wheat.—The imports of wheat into the United Kingdom during 1900 were valued at \$114,000,000, amounting to 128,000,000 bushels. Nearly one-half of these imports came from the United States, from which source consignments having an aggregate value of \$55,000,000, or 48 per cent of the total, were shipped to the British market. Measured in quantity, the wheat received from the United States amounted to 61,000,000 bushels. After the United States the principal source of supply in 1900 was Argentina, from which country 35,000,000 bushels, valued at about \$30,000,000, or 26 per cent of the total, were imported. About 9 per cent came from Canada, the imports of Canadian wheat amounting to 12,000,000 bushels, with a value of about \$11,000,000. Russia furnished 6.5 per cent of the wheat imports, sending 8,359,000 bushels, with a value of \$7,428,000. Imports amounting to 7,071,000 bushels, and valued at \$6,402,000, were received from Australasia, that source supplying about 5.6 per cent of the total. From Germany 3,413,000 bushels were purchased,

the value being \$2,917,000, or 2.6 per cent of the total. Roumania contributed shipments amounting to 1.1 per cent of the total, the quantity being 1,411,000 bushels and the value \$1,278,000.

Of the several countries mentioned, the United States is the only one that shows any considerable constancy as a source of supply. In the other great wheat-exporting countries the surplus available for shipment to foreign markets from year to year is a much more variable quantity than in the United States. The imports from Argentina during 1900 were exceptionally large, while those from Russia were much smaller than in some of the preceding years. In 1896, for instance, Argentina furnished only 9,198,000 bushels, while Russia supplied 32,000,000 bushels, or nearly the reverse of the situation in 1900. The imports from Canada and from Australasia during 1900 were also much in excess of the average. The shipments received from Germany during 1900 were considerably larger than those reported for the years immediately preceding, while in the case of Roumania the 1900 figures were noticeably small when compared with the returns for 1896, in which year imports amounting to 10,000,000 bushels were recorded.

Among the various other countries contributing to the British wheat supply in 1900 Bulgaria, Cyprus, Uruguay, Denmark, and European Turkey sent the principal shipments.

Wheat flour.—The enormous quantities of wheat in the grain that are annually brought into the United Kingdom to be milled do not by any means supply the demand. The grain imports are each year supplemented by heavy importations of flour. During 1900 over 12,000,000 barrels of foreign flour were disposed of in the British market at a value of nearly \$50,000,000. The principal part of these imports came from the United States, from which country about 10,000,000 barrels were procured, the value amounting to \$41,000,000, or 83 per cent of the total. When contrasted with the importations from the United States the shipments received from other countries seem comparatively small. Canada, Austria-Hungary, and France were the only competitors of any considerable importance. Canada supplied 683,000 barrels, valued at \$2,777,000, or 5.7 per cent of the total. From Austria-Hungary there were imports amounting to 667,000 barrels, with a value of \$3,063,000, or 6.2 per cent. Owing to the exceptionally high grade of Hungarian flour, the imports from that source, although somewhat less in quantity than the imports from Canada, exceeded the latter quite noticeably in value. France, which ranked next to Canada and Austria-Hungary as a competitor of the United States in the British flour trade, supplied 432,000 barrels, the value amounting to \$1,577,000, or 3.2 per cent of the total.

Of the remaining sources of supply Australasia, Argentina, and Belgium were the most important.

Corn.—During 1900 the United Kingdom expended \$60,000,000 in the importation of indian corn, or maize, the quantity received amounting to 108,000,000 bushels.

Corn is imported chiefly as a feed for live stock, including poultry. The amount used for manufacturing purposes, such as distilling, the production of corn starch, etc., is comparatively small, and the amount used for human food still smaller.

The United States is naturally the principal contributor to the supply. The imports from this source during 1900 amounted to 77,000,000 bushels, having an aggregate value of \$42,000,000, or 70 per cent of the total. The leading competitors of the United States in the corn trade of 1900 were Argentina, Canada, Roumania, and Russia, named in the order of their importance. During that year Argentine corn was imported into the British market to the extent of 13,000,000 bushels, the value amounting to \$7,369,000, or about 12 per cent of the total. The quantity imported from Canada was 9,591,000 bushels, with a value of \$5,205,000, or 8.7 per cent. From Roumania 4,553,000 bushels, valued at \$2,940,000, or 4.9 per cent, were imported. The shipments received from Russia amounted in quantity to 3,779,000 bushels, and in value to \$2,344,000, forming 3.9 per cent of the total.

European Turkey, Morocco, and Uruguay stood foremost among the remaining sources from which in 1900 the United Kingdom drew its indian-corn supply.

Corn meal.—In addition to the heavy receipts of indian corn in the grain, the United Kingdom also makes annual importations, but to a very limited extent, of corn meal. In 1900 933,000 barrels of this product were received from abroad, the value amounting to \$2,221,000. Practically all of these imports were furnished by the United States.

Like the imports of corn in the grain, those of meal are used principally as feed for live stock.

Oats.—The United Kingdom is also a heavy buyer of oats, depending largely on outside sources for this important feed stuff. During 1900 oats were imported to the extent of 70,000,000 bushels, the value amounting to \$25,000,000.

Russia and the United States are the most important sources of supply. For several years prior to 1900 the United States outstripped its chief competitor in the quantity furnished, but in 1900 Russia came to the front with exceptionally heavy shipments, supplying 37,000,000 bushels, worth \$13,000,000, or 52 per cent of the total. The imports from the United States in that year amounted to 20,000,000 bushels, with a value of \$7,201,000, or 28 per cent. After Russia and the United States, Germany and Canada are the principal contributors. In 1900 the former country furnished 5,884,000 bushels, valued at \$2,289,000, or 9 per cent of the total, and the latter 5,313,000 bushels, valued at \$1,991,000, or 7.8 per cent.

Among the various other sources from which the United Kingdom bought oats in 1900, the Netherlands, Sweden, and Asiatic Turkey furnished the largest shipments.

While the principal part of the oats imported into the United Kingdom is unquestionably fed to live stock, a considerable quantity of this grain is also ground up into oatmeal to be used as human food, supplementing the large imports of that breakfast cereal in its prepared form.

Oatmeal.—Unfortunately the British trade statistics do not show the exact quantity of oatmeal imported, the returns for that item being consolidated with those for groats. The combined imports of oatmeal and groats in 1900 amounted to 94,000,000 pounds and had an aggregate value of \$2,549,000. Of these imports, the United States supplied 80,000,000 pounds, worth \$2,255,000, or 88 per cent of the total. Presumably more than half of the imports under this head from the United States consisted of oatmeal. The presumption is strengthened by the United States export returns for the fiscal year ended June 30, 1901, which show that in the year mentioned about 54,000,000 pounds of oatmeal were shipped from this country to the United Kingdom. Aside from the United States, the only country shipping oatmeal in any considerable quantities to the British market is Canada. In 1900 the shipments of oatmeal and groats received from Canada amounted to 13,000,000 pounds, worth \$270,000, or about 11 per cent of the total. An examination of the Canadian export returns shows that these shipments consisted chiefly of oatmeal.

Barley.—Barley is used quite extensively in the United Kingdom for malting, and also to some extent for bread purposes. During 1900 the imports of this grain amounted to 40,000,000 bushels, having a value of \$25,000,000. The principal importations came from the United States, Russia, Asiatic Turkey, and Roumania.

The United States contributed 9,980,000 bushels, with a value of \$6,569,000, or 26 per cent of the total. From Russia there were imported 11,000,000 bushels, worth \$6,145,000, or 25 per cent. The imports from Asiatic Turkey were recorded at 9,355,000 bushels, having a value of \$6,012,000, or 24 per cent. From Roumania 3,478,000 bushels were received, the value being \$1,986,000, or about 8 per cent.

The imports from Russia and Roumania during 1900 were much smaller than in average years, while on the other hand unusually large quantities came from the United States and Asiatic Turkey.

Among numerous other sources from which the barley supply of the United Kingdom was obtained in 1900, Canada, Germany, Chile, and France were the most important.

Rye.—Another bread grain that the United Kingdom purchases in considerable quantities is rye. During 1900 the importation of this cereal amounted to 2,449,000 bushels and had a value of \$1,751,000.

The quantities furnished from year to year by the several countries contributing to the supply have varied widely, and especially the imports from Russia and the United States. The two countries mentioned have alternated as the leading source of importation. In 1900 Russia furnished slightly larger shipments than the United States, the imports received from the former country amounting to 827,000 bushels and having a value of \$613,000, or 35 per cent of the total, while the United States contributed 821,000 bushels, valued at \$555,000, or 32 per cent. After Russia and the United States, the only important sources were Canada, Germany, and Roumania. In 1900 the imports from Canada were recorded at 510,000 bushels, with a value of \$363,000, or 21 per cent. Germany supplied in that year 216,000 bushels, the value amounting to \$165,000, or 9.4 per cent. The quantity of rye received from Roumania during 1900 was unusually small, amounting to only 60,000 bushels, with a value of \$44,000, or 2.5 per cent. The imports from all sources other than those mentioned comprised in value less than 1 per cent of the total.

MEAT PRODUCTS.

Next to breadstuffs, the item of largest value in the agricultural import trade of the United Kingdom is that comprising the various articles of merchandise known as meat products. During 1900 the total value of this class of imports reached the enormous sum of \$225,000,000.

A little over one-half of the British import trade in meat products had its source in the United States, from which country shipments were received amounting in value to \$116,000,000, or 52 per cent of the total. Foreign countries other than the United States supplied 28 per cent, the value of the imports from such sources amounting to \$63,000,000. From the outlying possessions of the United Kingdom there were imports valued at \$46,000,000, or 20 per cent of the total.

Hog products were decidedly the leading factor in this trade, their import value in 1900 reaching as high as \$102,000,000. The imports of beef products, which came next in importance, carried a value of \$62,000,000. Mutton and oleomargarin were also imported quite extensively.

Bacon.—Bacon, which is so staple an article of food in the United Kingdom, was the principal item under the head of hog products. During 1900 the British people expended for imported bacon the considerable sum of \$57,000,000, the quantity purchased amounting to 632,000,000 pounds. From the United States alone they imported 443,000,000 pounds, having a value of \$36,000,000, or 64 per cent of the total.

Although the United States controls the principal part of the trade, it has two aggressive competitors in Denmark and Canada. During

1900 Denmark sent to the British market 123,000,000 pounds of bacon, valued at \$15,000,000, or 26 per cent of the total. Canada furnished in that year 59,000,000 pounds, worth \$5,234,000, or about 9 per cent.

It will be noticed from the figures just quoted that the imports from Denmark and Canada brought proportionately a much higher price than the consignments received from the United States. In 1900 the average import price of all bacon coming from the United States was 8.2 cents per pound, whereas the import price of the Danish bacon averaged 12.1 cents and that of the Canadian bacon 8.8 cents per pound.

While the United States furnishes a much larger portion of the British bacon supply than either Denmark or Canada, the latter countries take greater pains to produce for export the particular grade preferred in the British market, and their produce accordingly brings on the average a considerably higher price than the bacon received from the United States.

Aside from the United States, Denmark, and Canada, the only sources from which bacon was imported into the United Kingdom to any considerable extent during 1900 were the Netherlands, Sweden, and Russia, but the combined importations from these three countries amounted to only about 1 per cent of the total.

Hams.—Next to bacon, hams form the principal article of importation under the head of hog products. In 1900 the ham imports of the United Kingdom amounted to 202,000,000 pounds and were valued at \$21,000,000. They were furnished chiefly by the United States, from which country shipments were received to the amount of 179,000,000 pounds, the value being \$18,000,000, or 89 per cent of the total. Canada was the only other country that contributed materially to the supply. Of Canadian hams, 22,000,000 pounds were purchased, the cost being \$2,175,000, or nearly 11 per cent of the total import value.

Lard.—Lard is another hog product the British supply of which is derived chiefly from the United States. In 1900 the United Kingdom purchased from abroad 216,000,000 pounds of this article, paying therefor the sum of \$16,000,000. Of these imports, 201,000,000 pounds were furnished by the United States, the value amounting to \$15,000,000, or 93 per cent of the total. The only other source from which lard was imported in any considerable quantities was Canada, that country supplying 13,000,000 pounds, valued at \$987,000, or about 6 per cent. The small additional imports received came principally from Denmark, Germany, and the Netherlands.

Pork.—Although pork is not imported into the United Kingdom as extensively as some of the other hog products, it nevertheless forms an item of considerable importance in the trade. During 1900 there were imports of fresh pork amounting to 78,000,000 pounds, and valued at \$7,277,000. Salted or pickled pork was purchased from abroad to the extent of 28,000,000 pounds, the value being \$1,467,000.

The fresh pork came chiefly from the Netherlands and the United States. The former country contributed 44,000,000 pounds, worth \$4,009,000, or 55 per cent of the total, and the United States 27,000,000 pounds, worth \$2,446,000, or 34 per cent. Among the additional sources of importation Belgium and Denmark ranked foremost.

The imports of pork in a salted or pickled condition were received chiefly from the United States and Denmark. The United States sent to the British market in 1900 14,000,000 pounds, valued at \$865,000, or 59 per cent of the total, while Denmark supplied about 9,248,000 pounds, valued at \$409,000, or 28 per cent. Of the remaining sources of supply, Canada and Germany were the most important.

Fresh beef.—Among the beef products imported fresh beef forms the leading item. During 1900 there were sent to the British market from abroad 462,000,000 pounds of this article, the value amounting to \$40,000,000. The United States was the principal source of supply, furnishing 321,000,000 pounds, with a value of \$29,000,000, or 74 per cent of the total. After the United States, the Australasian colonies were the principal contributors, supplying 81,000,000 pounds, worth \$5,685,000, or 14 per cent. Queensland and New Zealand controlled the largest part of the Australasian trade in fresh beef. Argentina was another country from which this product was purchased in considerable quantities. The imports from Argentina in 1900 amounted to 46,000,000 pounds, and had a value of \$3,247,000, forming about 8 per cent of the total. Among other countries engaged in this trade Denmark and Canada were the most prominent.

Preserved beef.—Beef in its various preserved forms is not imported by the United Kingdom nearly so extensively as fresh beef. During 1900 there were imports of salted or pickled beef to the extent of 22,000,000 pounds, valued at \$1,248,000, and of other cured beef, consisting chiefly of the canned article, to the extent of 58,000,000 pounds, valued at \$7,092,000.

The salted or pickled beef was received chiefly from the United States, that country supplying 21,000,000 pounds, worth \$1,191,000, or 95 per cent of the total. The remaining imports came largely from Canada.

The United States was also the principal source of supply as regards the cured beef imported by the United Kingdom, furnishing 32,000,000 pounds in 1900, valued at \$3,447,000, or 49 per cent of the total. Australasia contributed 30 per cent, supplying 17,000,000 pounds, worth \$2,129,000. The Australasian shipments came chiefly from Queensland and New South Wales. Belgium, Argentina, and Canada ranked foremost among the remaining countries from which imports were received.

Tallow.—Tallow is another meat product that the United Kingdom imports in large quantities. The British import returns for 1900 show that in that year 244,000,000 pounds of tallow and stearin were received

from abroad. Unfortunately the amount of stearin included in these figures can not be separately stated, but it was presumably a comparatively small portion of the whole. The combined imports had a value of \$14,000,000. They came chiefly from the Australasian colonies and from the United States. Australasia furnished 136,000,000 pounds, worth \$7,737,000, or 56 per cent of the total. New South Wales and New Zealand contributed the principal part of these shipments. From the United States 64,000,000 pounds were imported, the value being \$3,417,000, or 25 per cent. Argentina also contributed quite largely, supplying 20,000,000 pounds, valued at \$1,164,000, or about 8 per cent. Of the remaining sources of importation France, Belgium, the Netherlands, and Canada were the most important.

Mutton.—During 1900 the British people imported 380,000,000 pounds of fresh mutton, at a cost of \$28,000,000. More than half of these imports came from the Australasian colonies, the shipments received from that source amounting to 217,000,000 pounds, and having a value of \$16,000,000, or 58 per cent of the total. Aside from Australasia the only important sources of supply were Argentina and the Netherlands, the former country contributing 125,000,000 pounds and the latter country 37,000,000 pounds. The imports from Argentina were valued at \$8,220,000, or 29 per cent of the total, and the imports from the Netherlands at \$3,589,000, or 13 per cent.

Oleomargarin, or imitation butter.—Another article of importation classified under the head of meat products is oleomargarin, or imitation butter. During 1900 the British people spent about \$12,000,000 for imports of this product, the quantity received amounting to 103,000,000 pounds. The oleomargarin imported into the United Kingdom comes chiefly from the Netherlands. In 1900 that country supplied 97,000,000 pounds, valued at \$11,000,000, or 93 per cent of the total. Among the remaining countries of supply, France and Germany were the largest contributors. The United States furnished only about 75,000 pounds, worth a little over \$5,000.

COTTON.

After the two large groups of merchandise known as breadstuffs and meat products, the most important factor in the agricultural import trade of the United Kingdom is cotton, enormous quantities of which are annually purchased to supply the British mills with raw material. For this staple article, which is the basis of one of their greatest manufacturing industries, the British people are largely dependent upon the United States. During 1900 there were shipped to the British market from all sources 1,779,000,000 pounds of cotton, having an aggregate value of about \$200,000,000. Of these imports 1,760,000,000 pounds, worth over \$199,000,000, consisted of raw cotton, and 19,000,000 pounds, worth \$656,000, of waste cotton.

Of the raw cotton imported the United States furnished 1,365,000,000 pounds, valued at \$147,000,000, or 74 per cent of the total. Next to the United States the most important source of supply was Egypt. The peculiar, long-fibered cotton of that country was imported to the extent of 312,000,000 pounds, the value amounting to \$44,000,000, or 22 per cent. The British East Indies also supplied cotton in considerable quantities. From that source 37,000,000 pounds were procured, the value being \$3,387,000, or 1.7 per cent. Madras furnished the principal part of these shipments. About 30,000,000 pounds, valued at \$3,259,000, or 1.6 per cent, came from Brazil. Peru, Chile, and China stood foremost among the countries from which additional imports were received.

DAIRY PRODUCTS.

Next to the enormous imports of breadstuffs and meat products required to feed the British people the most important group of food stuffs received from abroad is that comprising the several products of the dairy—butter, cheese, and milk. In the importation of these three products the people of the United Kingdom expended during 1900 nearly \$127,000,000.

The part played by the United States as a contributor to the British supply of these articles was strikingly insignificant, particularly when contrasted with the situation just described as regards breadstuffs and meat products. Of the sum paid by the British for imported dairy products in 1900 the United States received only about \$10,000,000, or less than 8 per cent. The outlying possessions of the United Kingdom were paid \$35,000,000, or about 28 per cent. The bulk of the trade, however, was controlled by foreign countries other than the United States, the amount paid to such countries reaching as high as \$82,000,000, and forming nearly 65 per cent of the total.

Butter.—Among the dairy products imported, butter was of course the principal item. The butter imported by the British people in 1900 cost them \$85,000,000, the quantity received amounting to 378,000,000 pounds. Denmark was the leading source of supply. The imports from that country during 1900 amounted to 166,000,000 pounds, and had a value of \$39,000,000, forming 46 per cent of the total.

After Denmark, the principal sources from which the United Kingdom purchases butter are Australasia, France, the Netherlands, Sweden, and Russia. During 1900 the Australasian colonies sent to the British market 58,000,000 pounds, the import value amounting to \$12,000,000, or 14 per cent. Victoria contributed the largest portion of these shipments, but considerable quantities were also received from New Zealand and New South Wales. The amount of butter imported from France in 1900 was 36,000,000 pounds, having a value of \$8,689,000, or 10 per cent. The Netherlands contributed 32,000,000 pounds, worth \$6,883,000, or 8.1 per cent. From Sweden there were

imports valued at \$4,934,000, or 5.8 per cent, the quantity being 22,000,000 pounds. From Russia, including Finland, butter was purchased to the extent of 23,000,000 pounds, the value being \$4,773,000, or 5.6 per cent.

Among the various other countries that contributed during 1900 to the British butter supply should be mentioned Canada, Belgium, and the United States. The quantity supplied by the United States was surprisingly small, amounting to only 6,277,000 pounds, with a value of \$1,206,000, or 1.4 per cent.

Butter is one of the agricultural products of the United States for which there should be an exceptional opportunity in the way of increased export trade, provided proper care is taken to supply an article that can successfully compete with the high-grade product now furnished by competing countries.

Cheese.—Another dairy product for which the United Kingdom depends quite largely on outside sources of supply is cheese. During 1900 303,000,000 pounds of this product were imported into the British market, at a cost of \$33,000,000. More than half of this sum went to Canada, that country supplying shipments to the value of \$18,000,000, or 56 per cent of the total. The quantity received from Canada was 169,000,000 pounds. The United States ranked second as a source of supply, contributing 76,000,000 pounds, worth \$8,471,000, or 25 per cent. Cheese was also purchased quite extensively from the Netherlands, that country sending shipments to the amount of 37,000,000 pounds, the value being \$3,891,000, or about 12 per cent. From Australasia 9,072,000 pounds, having a value of \$1,063,000, or about 3 per cent, were imported, these shipments coming chiefly from New Zealand. Among the remaining sources from which the United Kingdom procured its cheese supply in 1900 Belgium and France were the most important.

Milk.—The British people consume large quantities of condensed milk. The imports of this product in 1900 amounted to 111,000,000 pounds, with a value of \$8,486,000. In addition to the condensed milk imported, 1,751,000 pounds of fresh milk were purchased from foreign countries at a cost of \$131,000. France, Denmark, and the Netherlands were the principal contributors to the fresh-milk supply.

Of the condensed milk procured from abroad consignments amounting to 43,000,000 pounds, with a value of \$3,748,000, or 44 per cent of the total, were recorded as coming from France, but unquestionably a large part of these consignments originated in Switzerland. From the Netherlands there were imports valued at \$2,930,000, or 35 per cent, the quantity amounting to 44,000,000 pounds. Norway supplied 12,000,000 pounds, valued at \$908,000, or 11 per cent. From the United States shipments amounting to 4,178,000 pounds were received, the value being \$377,000, or 4.5 per cent. Of the remaining coun-

tries from which condensed milk was imported, Belgium, Germany, and Italy sent the largest shipments.

WOOL.

After cotton and wheat the largest single item in point of value among the agricultural products imported into the United Kingdom during 1900 was wool. The amount expended in the importation of this raw material was \$115,000,000. Of the sum mentioned, \$93,000,000, or 81 per cent, went to the various British possessions, the amount of wool imported into the United Kingdom from foreign sources being a comparatively small portion of the total. In 1900 the receipts from countries not under the British flag had a value of about \$22,000,000, forming about 19 per cent.

Under the general head of wool the British import returns include mohair, other goats' hair, hair of the alpaca, vicuña, and llama, etc. The principal part of the item, however, consists of sheep's wool, of which 553,000,000 pounds were imported in 1900, with an aggregate value of \$106,000,000. About three-fourths of the wool sent to the British market in that year came from the Australasian colonies. The imports from this source amounted to 386,000,000 pounds, and were valued at \$79,000,000, or 75 per cent of the total. New South Wales, New Zealand, and Victoria were the largest contributors, but considerable shipments were also received from the other colonies. Of the remaining British possessions, the Cape of Good Hope and the British East Indies were the principal sources of supply. From the Cape of Good Hope 23,000,000 pounds were imported, having a value of \$4,849,000, or 4.6 per cent of the total. The British East Indies furnished 31,000,000 pounds, valued at \$4,034,000, or 3.8 per cent, Bombay alone supplying \$3,700,000 worth.

Among the foreign countries that contributed to the British import trade in wool, France, Argentina, Asiatic Turkey, and Chile were the leading factors. From France 20,000,000 pounds were imported, the value being \$4,221,000, or about 4 per cent of the total. The imports from Argentina amounted to 11,000,000 pounds, and had a value of \$1,710,000, or 1.6 per cent. Asiatic Turkey supplied 13,000,000 pounds, worth \$1,673,000, or 1.6 per cent. From Chile there were imports amounting to 12,000,000 pounds, with a value of \$1,635,000, or 1.5 per cent.

Belgium, Russia, Uruguay, and Germany were foremost among the various other countries from which the United Kingdom imported wool during 1900. The United States, although a heavy importer of wool, annually contributes small shipments to the British import trade. During 1900 these shipments amounted to 701,000 pounds, and were valued at \$92,000.

The quantity of mohair imported by the United Kingdom in 1900 was 18,000,000 pounds, the value being \$5,973,000. These imports came chiefly from the Cape of Good Hope and from European Turkey. Other goats' hair, and hair of the alpaca, vicuña, and llama were imported in much smaller amounts.

SUGAR.

Sugar is another important food product for which the United Kingdom depends almost entirely on foreign sources of supply. In 1900 imported sugar cost the British people \$94,000,000, and of this sum about \$89,000,000, or 95 per cent of the total, was paid to foreign countries. The sugar received from British possessions amounted in value to only \$4,327,000, or less than 5 per cent.

Of the sugar imported into the British market during 1900 2,156,000,000 pounds had been refined, while 1,482,000,000 pounds were received in the raw state. The refined sugar was valued at \$60,000,000 and the unrefined at \$34,000,000. More than half of the refined sugar came from Germany, that country contributing 1,329,000,000 pounds, with a value of \$37,000,000, or 61 per cent. From France 485,000,000 pounds were received, the value amounting to \$13,000,000, or 22 per cent. The Netherlands furnished 253,000,000 pounds, and Belgium 68,000,000 pounds. The imports from the former country were valued at \$7,274,000, or 12 per cent, and the imports from the latter country at \$1,900,000, or 3.2 per cent. Among other sources of supply the most important were Austria-Hungary and Russia. Small shipments, amounting to 210,000 pounds, and valued at \$9,600, were recorded from the United States.

Of the unrefined sugar imported 1,147,000,000 pounds, worth \$25,000,000, consisted of beet sugar, and 335,000,000 pounds, worth \$8,743,000, of cane sugar.

France, Germany, and Belgium were the principal sources of the raw beet sugar. From France 480,000,000 pounds were received, the value amounting to \$11,000,000, or 44 per cent of the total: Germany supplied 358,000,000 pounds, worth \$7,625,000, or 31 per cent. The imports from Belgium, amounting to 232,000,000 pounds, were valued at \$4,848,000, or 19 per cent. The Netherlands and Austria-Hungary were foremost among the remaining sources of importation.

Of the unrefined cane sugar imported nearly one-half came from the British tropical possessions, among which the British West Indies, British Guiana, the British East Indies, and Mauritius were the principal contributors. From the British West Indies 55,000,000 pounds were imported, the value being \$1,784,000, or 20 per cent of the total. The imports from British Guiana amounted to 38,000,000 pounds, and had a value of \$1,232,000, or 14 per cent. The British East Indies

furnished 42,000,000 pounds, valued at \$909,000, or 10 per cent. Mauritius contributed 19,000,000 pounds, worth \$400,000, or 4.6 per cent.

Among the foreign sources from which the United Kingdom received its largest imports of raw cane sugar in 1900 were France, Peru, Argentina, and the Philippine Islands. From France 50,000,000 pounds were purchased, the amount paid being \$1,402,000, or 16 per cent of the total. The consignments received from France consisted of sugar originally imported into that country from tropical sources, and probably in chief part from the French West Indies. From Peru the United Kingdom bought 27,000,000 pounds, valued at \$629,000, or 7.2 per cent. Argentina furnished 24,000,000 pounds, and the Philippine Islands about the same amount. The imports from Argentina were valued at \$523,000, or about 6 per cent, and the imports from the Philippines at \$479,000 or 5.5 per cent. Among other sources from which the United Kingdom received unrefined cane sugar in considerable quantities should be mentioned Java, Brazil, Chile, and Egypt. From the United States 33,000 pounds were imported, the value being \$866.

To supplement the enormous sugar supply required by the people of the United Kingdom that country annually procures from abroad large quantities of molasses.^a The imports of this product in 1900 amounted to 151,000,000 pounds and were valued at \$1,694,000. They were furnished chiefly by the United States, from which source 124,000,000 pounds were received, the value being \$1,483,000, or 88 per cent of the total.

FRUITS AND NUTS.

Fruits and nuts form an important class among the agricultural products the British people are obliged to procure from beyond seas. The importations under this head during 1900 were exceptionally large, having a total value of \$65,000,000. They were supplied chiefly by foreign countries other than the United States, the imports from such sources amounting in value to \$52,000,000, and forming 80 per cent of the total. The British possessions furnished shipments to the value of \$7,428,000, or about 11 per cent. The imports from the United States were valued at \$5,732,000, or about 9 per cent.

Of the \$65,000,000 expended for fruits and nuts, about \$56,000,000 represents the sum paid for fruits and about \$9,000,000 the sum paid for nuts. Fresh fruits were imported to the value of about \$32,000,000, and fruits that had been dried or otherwise preserved to the value of about \$24,000,000. Oranges, apples, grapes, bananas, and lemons were the varieties of fresh fruit imported most extensively.

^a Including sirup.

Oranges.—Of oranges 570,000,000 pounds were received, the value being about \$10,000,000. Spain was the principal source of supply, the imports from that country amounting to 494,000,000 pounds and having a value of \$8,768,000, or 85 per cent of the total. The remaining shipments came chiefly from Asiatic Turkey, Italy, Portugal, and Egypt. The United States supplied only 426,000 pounds, valued at \$14,000.

Apples.—In 1900 there were imported into the British market 238,000,000 pounds of fresh apples, worth nearly \$6,000,000. Of these imports the United States furnished 101,000,000 pounds and Canada 90,000,000 pounds. The shipments received from the United States were valued at \$2,486,000, or 42 per cent of the total, and those from Canada at \$2,082,000, or 35 per cent. After the United States and Canada the principal sources of supply were Australasia, Belgium, France, the Netherlands, and Portugal.

Grapes.—The amount of grapes imported by the United Kingdom during 1900 was 66,000,000 pounds, having a value of \$2,896,000. A large part of these shipments came from Spain, that country supplying 53,000,000 pounds, worth about \$2,000,000, or 69 per cent of the total. The remaining imports were received chiefly from the Channel Islands, Portugal, and Belgium.

Bananas.—The Canary Islands supply most of the bananas purchased by the United Kingdom. Of the total importation for 1900, amounting to 1,287,000 bunches, worth \$2,671,000, these islands furnished 1,244,000 bunches, the value being \$2,572,000, or 96 per cent of the total. Next to the Canaries, the Madeira Islands sent the largest shipments.

Lemons.—The British imports of lemons, including limes and citrons, amounted in 1900 to 106,000,000 pounds, having a value of \$2,048,000. Italy, which was the principal source of supply, furnished 92,000,000 pounds, the value amounting to \$1,716,000, or 84 per cent of the total. The remaining imports came largely from Spain, although shipments of some importance were also received from Germany, Portugal, and France.

Other fresh fruits purchased by the United Kingdom in considerable quantities were plums, pears, and cherries. Of fresh plums there were imports to the amount of 47,000,000 pounds, having a value of \$1,911,000. Pears were imported to the extent of 53,000,000 pounds, worth \$1,785,000. The imports of cherries were recorded at 27,000,000 pounds, with a value of \$1,501,000. Each of these varieties came in largest quantities from France.

Among the dried fruits imported in 1900, currants and raisins were leading items.

Currants.—The imports of dried currants amounted to 92,000,000 pounds, and had a value of \$8,857,000. The principal part of these

imports came from Greece, that country sending to the British market 87,000,000 pounds in 1900, the value being \$8,488,000, or 96 per cent of the total. The Netherlands, France, Belgium, and Germany stood foremost among the remaining sources of supply.

Raisins.—Raisins were imported during 1900 to the extent of 74,000,000 pounds, the value amounting to \$6,414,000. Spain and Asiatic Turkey were the largest contributors. From Spain 45,000,000 pounds were received and from Asiatic Turkey 24,000,000 pounds. The imports from the former country had a value of \$3,765,000, or 59 per cent of the total, and those from the latter country a value of \$2,298,000, or 36 per cent. Of the remaining sources of importation Greece and France sent the largest consignments. From the United States 288,000 pounds were recorded, the value being \$28,000.

Figs.—Another dried fruit that is imported to a considerable extent is the fig. In 1900 the imports of this fruit, including fig cake, amounted to 18,000,000 pounds, and had a value of \$1,319,000. They came chiefly from Asiatic Turkey.

Nuts.—As regards the nuts imported, a distinction is made between those used for food and those for other purposes. The importations of food nuts during 1900 amounted in value to \$5,704,000. The principal item was almonds, of which shipments worth \$2,773,000 were received, the quantity being about 16,000,000 pounds. Spain and Morocco were the leading sources of supply. From Spain 5,928,000 pounds were purchased, and from Morocco 4,515,000 pounds. The imports from the former country cost \$1,052,000, or 38 per cent of the total, and the imports from the latter \$821,000, or 30 per cent. The remaining importations came chiefly from Italy, Portugal, France, and the Canary Islands.

Among the nuts imported for purposes other than food, the leading item was that comprising the various oil nuts, of which shipments amounting to 127,000,000 pounds were received in 1900, the value being \$3,478,000. The oil nuts came from numerous sources, but principally from the Niger Protectorate, the British East Indies, Australasia, Sierra Leone, and the Pacific islands. The United States supplied 224,000 pounds, worth \$7,000.

LIVE ANIMALS.

Another important item in the agricultural import trade of the United Kingdom is that comprising the various kinds of live animals. The imports under this head during 1900 amounted in value to nearly \$54,000,000. Cattle formed the principal part of the item, but horses and sheep were also imported quite extensively.

A large part of the British import trade in live stock is controlled by the United States. During 1900 that country sent shipments valued at \$37,000,000, or about 70 per cent of the total. Other foreign

countries supplied 12 per cent, the imports from such sources having a value of \$6,481,000. From the British possessions shipments were received to the value of \$9,731,000, or 18 per cent.

Cattle.—During 1900 there were imported into the British market 496,000 head of cattle, having an aggregate value of \$44,000,000. Of these cattle 350,000 head came from the United States, the imports from that source amounting in value to \$32,000,000, or 72 per cent of the total. The remaining importations had their origin chiefly in Canada and Argentina. From the former country 105,000 head were received, and from the latter 39,000 head. The imports from Canada were valued at \$8,790,000, or 20 per cent, and those from Argentina at \$3,248,000, or 7.4 per cent. The only other sources from which imports came in 1900 were the Channel Islands and Uruguay.

Horses.—The United States also supplies most of the horses imported into the United Kingdom. The total number of horses sent to the British market from abroad during 1900 was 52,000, worth \$6,572,000. Of these horses 30,000 were received from the United States, their value being \$4,638,000, or 71 per cent of the total. After the United States Russia was the principal source of supply in 1900, the horses imported from that country numbering 12,000, and having a value of \$569,000, or 8.7 per cent of the total. Among the remaining countries that shipped horses to the British market in 1900, France, Canada, the Netherlands, and Denmark stood foremost.

Sheep.—Sheep were imported into the United Kingdom during 1900 to the value of \$2,969,000, the number received being 383,000 head. Of these imports 179,000 head came from Argentina and 143,000 head from the United States. The sheep purchased from Argentina cost \$1,406,000, or 47 per cent of the total, and those from the United States \$1,094,000, or 37 per cent. Other sheep imported in that year were received principally from Canada and Denmark. A small number also came from Uruguay.

TEA.

Tea, which forms the favorite table drink of the British people, was imported in 1900 to the extent of nearly 300,000,000 pounds, costing about \$52,000,000. The United Kingdom derives the principal part of its tea supply from the British dependencies in the East Indies, and especially from Bengal and Ceylon, which together furnished in 1900 nearly nine-tenths of all the tea sent to the British market. The imports from Bengal amounted to 151,000,000 pounds, worth \$27,000,000, and those from Ceylon to 114,000,000 pounds, worth \$20,000,000. The quantity received from all British possessions was 271,000,000 pounds, with an aggregate value of \$47,000,000, or 91 per cent of the total. The receipts from countries other than British territory amounted to only 28,000,000 pounds, valued at \$4,583,000, or 9 per

cent. China was the principal foreign contributor to the supply, furnishing 19,000,000 pounds, worth \$2,991,000, or 5.8 per cent.

Considering the prominence of China as a tea-exporting country, it is surprising that larger shipments from that source are not sent to the United Kingdom. During 1900 China supplied little more than one-twentieth of the British tea requirements. In the tea import trade of the United States, on the other hand, China is decidedly the most important factor, contributing fully half of the entire supply. Japan, which ranks next to China among the sources from which the United States purchases tea, sells a comparatively insignificant amount to the United Kingdom. The consignments to the British market from Japan in 1900 fell short of 100,000 pounds, and were valued at less than \$18,000.

It is doubtless a fact, however, that quantities of tea from Japan as well as from China are included in the British import trade with the United States. During 1900 American houses in the tea business sent to the United Kingdom consignments amounting to 1,031,000 pounds and valued at \$179,000. As the United States procures most of its tea from China and Japan, these shipments probably consisted largely of the Chinese and Japanese article.

SEEDS.

During 1900 the British people expended about \$40,000,000 in the importation of seeds. They came chiefly from foreign countries other than the United States, the shipments from such sources having a value of \$26,000,000, and forming 65 per cent of the total. The United States furnished only about 6 per cent, the value being \$2,493,000. From British possessions there were imports worth about \$12,000,000, or 29 per cent.

The seed imports of the United Kingdom consist largely of oilseeds. During 1900 such seeds were purchased from abroad to the value of \$36,000,000, most of which sum was paid for flaxseed and cotton seed.

Flaxseed.—Of flaxseed 14,000,000 bushels, worth \$20,000,000, were imported. Nearly half of these imports originated in the British East Indies, from which source 6,291,000 bushels were received, the value being \$9,536,000, or 47 per cent of the total. Bengal furnished most of the East Indian consignments. After the British East Indies the leading sources of supply were Russia and Argentina. From the former country there were imports amounting to 3,155,000 bushels, and having a value of \$4,855,000, or 24 per cent. Argentina contributed 2,564,000 bushels, worth \$3,320,000, or 16 per cent. Among the other countries from which flaxseed was imported in 1900, Germany, the United States, European Turkey, and the Netherlands stood foremost. The United States supplied 536,000 bushels, valued at \$787,000, or about 4 per cent.

Cotton seed.—Of cotton seed the United Kingdom imported during the year mentioned 911,000,000 pounds, valued at \$13,000,000. Decidedly the largest part of these imports came from Egypt, that country sending to the British market 782,000,000 pounds, valued at \$11,000,000, or 88 per cent of the total. Next to Egypt the most important sources of importation were Brazil, the United States, and Asiatic Turkey. From Brazil shipments amounting to 53,000,000 pounds were received, the value being \$562,000, or 4.4 per cent. The United States furnished 40,000,000 pounds, worth \$524,000, or 4.1 per cent. The importations from Asiatic Turkey amounted to 22,000,000 pounds, with a value of \$231,000, or 1.8 per cent. Cotton seed also came in considerable quantities from the South American countries of Peru, Chile, and Colombia.

Rape seed.—Among the various other oilseeds imported into the United Kingdom during 1900, rape seed stood foremost as regards value. The imports for that year had a valuation of \$1,200,000 and amounted in quantity to 1,108,000 bushels. They came chiefly from the British East Indies and from Russia.

Grass seed.—In addition to the oilseeds there were several other kinds of seeds imported, grass seed forming the principal item. During 1900 the grass-seed imports amounted to 29,000,000 pounds, and had a value of \$2,477,000. The United States was the leading source of supply. From that country 12,000,000 pounds were received, the value amounting to \$1,125,000, or 45 per cent of the total. Large imports came also from Germany, Australasia, and France. Germany furnished 4,157,000 pounds, worth \$425,000, or 17 per cent. From Australasia there were imports to the value of \$363,000, or about 15 per cent, the quantity received being 4,458,000 pounds. The Australasian shipments came chiefly from New Zealand. France contributed 5,072,000 pounds, with a value of \$274,000, or 11 per cent. Additional sources of supply included the Netherlands, Chile, Belgium, and Canada.

HIDES AND SKINS.

Among the various classes of raw materials that figure extensively in the agricultural import trade of the United Kingdom, hides and skins occupy a place of considerable importance. During 1900 hides and skins were imported to the value of nearly \$33,000,000. The major portion of the supply came from British possessions, the shipments received from such sources having a value of \$18,000,000, or 55 per cent of the total. The United States furnished only about \$96,000 worth, or less than 1 per cent. From other foreign countries there were imports to the value of \$14,000,000, or about 44 per cent.

According to the official import returns of hides and skins for 1900,

consignments came in under the designation of hides to the value of \$17,000,000 and under the designation of skins to the value of \$16,000,000.

Hides.—The quantity of hides imported was 155,000,000 pounds, the value being, as stated above, \$17,000,000. From the British East Indies, which formed the leading source of supply, there was an importation of 65,000,000 pounds, with a value of \$7,145,000, or 43 per cent of the total. Bombay and Bengal contributed the principal part of these shipments.

After the British East Indies the countries that sent the largest consignments were Italy, Belgium, and Germany. The imports from Italy amounted to 11,000,000 pounds and had a value of \$1,453,000, or 8.7 per cent. Belgium supplied 13,000,000 pounds, worth \$1,396,000, or 8.4 per cent. From Germany 12,000,000 pounds were procured, the value amounting to \$1,175,000, or 7.1 per cent. The Netherlands, France, Australasia, Russia, and Denmark stood foremost among the various other sources of supply. From the United States 476,000 pounds were imported, the value being \$53,000, or much less than 1 per cent of the total.

The consignments received under the designation of skins consisted chiefly of sheepskins and goatskins, the only other item of importance being rabbit skins.

Sheepskins.—About 15,000,000 sheepskins, having an aggregate value of \$7,784,000, were imported into the United Kingdom during 1900. From Australasia, which was decidedly the most important source of importation, 6,769,000 were received, their value amounting to \$3,306,000, or 42 per cent of the total. While each of the Australasian colonies contributed to these imports, New Zealand sent by far the largest shipments.

Next to Australasia, the principal sources of supply were the Cape of Good Hope and Argentina, the former country contributing 2,681,000 and the latter 1,419,000. The imports from the Cape were valued at \$1,454,000, or 19 per cent of the total, and the imports from Argentina at \$1,164,000, or 15 per cent. Among the numerous other countries engaged in this trade France, Germany, and Spain held leading positions. Imports of 73,000 sheepskins, worth \$22,000, were recorded as coming from the United States.

Goatskins.—The number of goatskins imported into the United Kingdom during 1900 was about 15,000,000, their aggregate value amounting to \$6,876,000. The British East Indies ranked foremost as a source of supply. The goatskins received from that source numbered 7,617,000, and had a value of \$3,114,000, or 45 per cent of the total. Bengal furnished the principal part of these shipments.

Aside from the British East Indies there were many additional sources

of importation, chief among them being Russia, France, and the Cape of Good Hope. Russia sent 1,984,000 skins, having a value of \$993,000, or 14 per cent of the total. From France 1,471,000 were imported, the value being \$771,000, or 11 per cent. The Cape of Good Hope supplied 1,022,000, worth \$536,000, or 7.8 per cent. Among other countries from which imports came in 1900 should be mentioned Morocco, China, and the Netherlands. Small shipments were recorded from the United States, the skins received from that country numbering 35,000, with a value of \$16,000.

Rabbit skins.—The United Kingdom affords a large market for rabbit skins. The number received from abroad during 1900 was 38,000,000, having a total import value of \$1,046,000. The trade is controlled largely by Australasia, from which source 24,000,000 skins were imported in 1900, the value being \$673,000, or 64 per cent of the total. Victoria, New Zealand, and South Australia were the principal factors in the trade.

Outside of Australasia the country from which rabbit skins were imported most extensively was Belgium. The number of skins received from Belgium in 1900 was 6,312,000, valued at \$243,000, or 23 per cent. The only other countries that sent shipments of any considerable size were France, Germany, and the Netherlands.

VEGETABLES.

Vegetables form another item of considerable importance among the various classes of imported agricultural produce that make up the food supply of the British people. During 1900 the sum expended in the importation of vegetables amounted to \$31,000,000. The part played by the United States as a contributor to the supply was comparatively small, the imports received from that source having a value of only \$1,411,000, or less than 5 per cent of the total. From the various other foreign countries there were importations valued at \$23,000,000, or 74 per cent. The outlying possessions of the United Kingdom contributed 21 per cent, sending shipments worth \$6,461,000.

Measured in value more than two-thirds of the vegetables procured from abroad during 1900 were imported fresh. The aggregate value of the fresh vegetables received in that year amounted to about \$23,000,000. Potatoes, onions, and tomatoes were the principal varieties. Dried vegetables, consisting largely of peas and beans, with smaller quantities of vetches and lentils, were imported to the value of \$6,763,000. Preserved vegetables were purchased much less extensively.

Potatoes.—Of potatoes about 17,000,000 bushels, worth \$11,000,000, were imported. France, the Channel Islands, Belgium, and Germany were the leading sources of importation. From France shipments were received to the value of \$3,001,000, or 28 per cent of the total,

the quantity being 4,093,000 bushels. The imports from the Channel Islands were recorded at 1,968,000 bushels, with a value of \$2,622,000,^a or 24 per cent. Belgium contributed 5,610,000 bushels, worth \$2,424,000, or 22 per cent. From Germany 2,480,000 bushels were received, the value amounting to \$1,196,000, or 11 per cent. Of the remaining sources of supply the most important were the Netherlands, Portugal, and the Canary Islands.

Onions.—The quantity of onions imported during 1900 was 7,310,000 bushels, and the value \$4,149,000. Spain, Egypt, and the Netherlands were the principal contributors. From Spain 2,394,000 bushels were received, having a value of \$1,502,000, or 36 per cent of the total. Egypt supplied 1,587,000 bushels, valued at \$1,023,000, or 25 per cent. The imports from the Netherlands amounted to 1,887,000 bushels, and were valued at \$825,000, or 20 per cent. Among other sources of supply should be mentioned France, Belgium, Portugal, and Germany.

Tomatoes.—The tomato imports were recorded at 93,000,000 pounds, with a value of \$3,856,000. They came chiefly from the Channel Islands, the Canaries, France, and Spain. From the Channel Islands there were shipments valued at \$1,397,000,^a or about 36 per cent of the total, the quantity received from that source amounting to 17,000,000 pounds. The Canary Islands supplied 21,000,000 pounds, worth \$1,002,000, or 26 per cent. The imports from France amounted to 16,000,000 pounds and were valued at \$529,000, or 14 per cent. Spain furnished 23,000,000 pounds, with a value of \$429,000, or 11 per cent. Among other countries contributing to the supply Italy, the United States, and Portugal stood foremost. From the United States 5,700,000 pounds, worth \$195,000, or about 5 per cent, were received.

Peas.—Of dried peas 4,198,000 bushels were consigned to the British market in 1900, the import value amounting to \$3,797,000. Canada and the United States furnished the largest shipments. The imports from Canada amounted to 1,586,000 bushels, worth \$1,346,000, or 35 per cent of the total. The United States sent 1,085,000 bushels, having a value of \$972,000, or 26 per cent. Of the remaining sources of supply the Netherlands, Russia, the British East Indies, and Germany were the most important.

Beans.—Dried beans were imported by the United Kingdom during 1900 to the amount of 3,206,000 bushels, having a value of \$2,613,000. They came in largest quantities from Egypt, Morocco, and Asiatic Turkey. Egypt contributed 1,043,000 bushels, Morocco 731,000

^a The exceptionally high price of the potatoes imported from the Channel Islands is explained by the fact that these imports consist chiefly of early potatoes that are sent into the British market before the general crop becomes available. For a similar reason the tomatoes imported from the Channel Islands bring an unusually high price.

bushels, and Asiatic Turkey 675,000 bushels. The imports from Egypt were valued at \$783,000, or 30 per cent of the total; those from Morocco at \$630,000, or 24 per cent; and those from Asiatic Turkey at \$555,000, or 21 per cent. Germany and Russia stood foremost among the additional sources of supply.

Vetches and lentils.—The imports of vetches and lentils in 1900 amounted to 408,000 bushels and had a value of \$354,000. They were received chiefly from Germany, Egypt, and Russia.

EGGS.

It necessitates the importation of a vast number of eggs to meet the requirements of the British people for this article of food. During 1900 as many as 169,000,000 dozens were imported, their aggregate value amounting to \$26,000,000. The principal contributors to the supply were Russia, Germany, Denmark, France, and Belgium. Russia, which has recently come into prominence as an exporter of eggs, shipped to the British market about 40,000,000 dozens, with an import value of \$5,400,000, or 21 per cent of the total. Germany sent shipments amounting to 35,000,000 dozens, and having a value of \$4,950,000, or 19 per cent. Denmark supplied 24,000,000 dozens, worth \$4,494,000, or 17 per cent; France, 23,000,000 dozens, worth \$4,222,000, or 16 per cent; and Belgium 24,000,000 dozens, worth \$3,569,000, or 14 per cent. Additional sources of importation included Canada, the United States, Egypt, and Morocco. The United States furnished 4,259,000 dozens, valued at \$760,000, or about 3 per cent.

WINES.

The people of the United Kingdom annually consume about 20,000,000 gallons of imported wines. To meet the British wants in this direction it cost during 1900 the considerable sum of \$25,000,000. The wines imported in that year came chiefly from three countries—France, Portugal, and Spain. From France 6,461,000 gallons were procured, the import value amounting to \$13,000,000, or 53 per cent of the total. Portugal supplied 4,635,000 gallons, worth \$5,404,000, or 21 per cent. From Spain there was an importation of 5,490,000 gallons, valued at \$3,417,000, or 14 per cent. The remaining imports were received principally from the Netherlands, Australasia, Germany, and Italy. It is probable that the wines recorded as coming from the Netherlands were largely of German origin. The United States shipped to the British market 199,000 gallons, worth \$115,000.

JUTE.

Among the raw materials the United Kingdom has to import in considerable quantities to supply the needs of domestic manufacture should be mentioned jute. Of this product 281,000 tons were purchased during 1900, the import value amounting to about \$20,000,000.

The principal part of the jute imports originated in the British East Indies, from which source 278,000 tons were procured, coming chiefly from Bengal. The jute received from the British East Indies cost \$19,965,000, or over 99 per cent of the entire sum spent in importation. As regards the comparatively small shipments that came from other sources, China was the largest contributor.

HEMP.

Hemp is another raw material that is imported quite extensively by the United Kingdom. The consignments received under the designation of hemp in 1900 amounted to about 100,000 tons, worth \$16,000,000, and doubtless consisted in chief part of Manila fiber, a product of the Philippine Islands. Other fibers included in the import returns of hemp were New Zealand flax, sisal grass, and sunn.

The statistics of hemp importation for 1900 show receipts from the Philippines to the extent of 38,000 tons, valued at \$6,969,000, or 44 per cent of the total. Manila fiber undoubtedly formed the principal part of the consignments to which these figures relate. This is probably true also as regards imports received from Hongkong, amounting to 11,000 tons, with a value of \$2,125,000, or 13 per cent. The shipments recorded as coming from Hongkong unquestionably included reexports of Manila fiber originally sent to that port by the Philippines.

Under the designation of hemp Australasia contributed about 13,000 tons, worth \$1,735,000, or 11 per cent. These consignments presumably consisted in the main of New Zealand flax.

From Italy there were hemp imports amounting to 11,000 tons and having a value of \$1,628,000, or 10 per cent.

The additional sources from which shipments were received under the designation of hemp included Germany, Russia, the British East Indies, and Mauritius.

TOBACCO.

It annually costs the British people between \$10,000,000 and \$20,000,000 for their tobacco supply. The sum paid during 1900 for imports of this product in its unmanufactured forms was about \$14,000,000, the consignments received aggregating 98,000,000 pounds.

The trade in tobacco is controlled very largely by the United States. In 1900 the shipments from that country to the British market amounted to 89,000,000 pounds and had a value of \$12,000,000, forming 84 per cent of the total.

The residue of the tobacco imported by the United Kingdom is purchased principally from the Netherlands and consists in the main of Sumatra tobacco brought from the Dutch East Indies. The consignments received from the Netherlands in 1900 aggregated 5,729,000 pounds and were valued at \$1,311,000, or about 9 per cent.

Among the other countries from which the United Kingdom procured its tobacco supply in 1900 should be mentioned Germany and France.

OIL CAKE.

Within the last few years the use of oil cake in the United Kingdom as a feed for live stock has become so extensive that enormous importations are now required to meet the demand. During 1900 more than \$12,000,000 worth of this product was disposed of in the British market. Measured in value, over half of the shipments received consisted of flaxseed oil cake. Cotton-seed oil cake was also imported quite extensively.

Flaxseed oil cake.—Of flaxseed oil cake there were imports amounting to 420,000,000 pounds and valued at \$6,793,000. Germany, Russia, and the United States were the leading sources of supply. From Germany 141,000,000 pounds were received, the value being \$2,315,000, or 34 per cent of the total. Russia supplied 119,000,000 pounds, worth \$1,984,000, or 29 per cent. The imports from the United States were recorded at 118,000,000 pounds, with a value of \$1,818,000, or 27 per cent.

Among the various other countries from which the United Kingdom purchased this kind of oil cake in 1900 the most important were the British East Indies, Canada, Spain, and Argentina.

Cotton-seed oil cake.—In quantity the imports of cotton-seed oil cake brought into the British market during 1900 almost exactly equaled the imports of flaxseed-oil cake, recorded at 420,000,000 pounds. The value of the cotton-seed oil cake, however, was considerably less, amounting to only \$5,117,000. The cotton-seed variety came in chief part from the United States, that country furnishing 283,000,000 pounds, valued at \$3,728,000, or 73 per cent of the total. Aside from the United States, the principal source of supply was Egypt, from which country 97,000,000 pounds were received, having a value of \$966,000, or 19 per cent. Among the additional sources from which this product came Mexico and France were the most important.

COFFEE.

While the people of the United Kingdom do not drink nearly so much coffee as tea, there is nevertheless a considerable consumption of the former product. The imports of raw coffee into the United Kingdom during the year 1900 were recorded at 85,000,000 pounds, with a value of \$12,000,000. Of this coffee 12,000,000 pounds, worth \$2,162,000, or 17 per cent of the total, came from the British East Indies, which form one of the leading sources of supply. Bombay and Madras furnish most of the East Indian coffee.

A considerable portion of the coffee imported by the United Kingdom, however, instead of being received directly from the country of

production, finds its way to the British market through intermediate channels. The United States, which is one of the most important of these intermediate points of shipment, forwarded in 1900 12,000,000 pounds, worth \$1,896,000, or 15 per cent. Through the ports of Germany indirect shipments were received to the extent of 14,000,000 pounds, the value being \$1,878,000, or 15 per cent.

After the British East Indies the largest direct importations in 1900 came from Costa Rica, the consignments from that source amounting to 11,000,000 pounds, having a value of \$1,651,000, or 13 per cent.

Other sources of supply included, in the order of their importance, Colombia, France, Salvador, Guatemala, Brazil, Nicaragua, and Chile.

RICE.

Rice finds considerable favor in the United Kingdom as an article of food. During 1900 this product in its various forms, including rice meal and flour, was imported to the extent of 705,000,000 pounds. The total import value was about \$12,000,000. The bulk of the rice imported in that year came from the British East Indies, from which source 525,000,000 pounds were received, the value amounting to \$8,119,000, or 69 per cent of the total. A large part of the East Indian shipments came from Burma and Bengal. Rice was also purchased quite extensively from the Netherlands, that country being a large importer from the East Indies. The quantity of rice procured from the Netherlands was 65,000,000 pounds, and its value \$1,697,000, or 14 per cent. French Indo-China was one of the important sources of supply. Among other countries from which considerable shipments were received should be mentioned Germany and Asiatic Turkey. Imports amounting to 1,471,000 pounds, and valued at \$36,000, were recorded as coming from the United States.

FLAX.

In addition to the large quantities of jute and hemp that are imported into the United Kingdom to supply the peculiar needs of the manufacturing industries in which these fibers are utilized, there is a considerable importation of flax. During 1900 flax, not including flax tow, was procured from abroad to the amount of 58,000 tons, the value amounting to \$11,000,000. Russia and Belgium contributed the principal part of these imports. From the former country 43,000 tons were received and from the latter 11,000 tons. The importations from Russia were valued at \$6,616,000, or 60 per cent of the total, and those from Belgium at \$3,481,000, or 32 per cent. Aside from Russia and Belgium the leading sources of supply were the Netherlands and Germany.

48 AGRICULTURAL IMPORTS OF UNITED KINGDOM, 1896-1900.

Of flax tow, about 13,000 tons were imported during 1900, costing \$1,207,000. The imports of this product, like the imports of flax fiber proper, came chiefly from Russia and Belgium.

TABLE OF LEADING AGRICULTURAL IMPORTS.

The following table enumerates the leading articles in the agricultural import trade of the United Kingdom for 1900, arranged in the order of their value, and shows in each instance the percentage received from the United States, from British possessions, and from other sources:

Leading articles in the agricultural import trade of the United Kingdom for 1900.

Articles imported.	Total.	From the United States.		From British possessions.		From other sources.

AGRICULTURAL IMPORTS IN DETAIL.

Following is a detailed statement showing the value of all of the various agricultural products imported into the United Kingdom during each year from 1896 to 1900, inclusive, together with the annual average for the period mentioned:

Value of the agricultural imports of the United Kingdom during the five calendar years 1896-1900.

Articles imported.	Annual average. 1896-1900.	Calendar years.				
		1896.	1897.	1898.	1899.	1900.

f Exclusive of kidney, haricot, and French beans.

g Including carob beans.

h United States standard gallons.

i Including table salt.

64 AGRICULTURAL IMPORTS OF UNITED KINGDOM, 1896-1900.

SOURCES OF AGRICULTURAL IMPORTS IN DETAIL.

The two series of tables presented on the following pages embrace all the agricultural imports of the United Kingdom, exhibiting for each article the value, and when possible the quantity, of the annual importations received from the various sources of supply during the five calendar years 1896-1900. To facilitate comparison, cross references are given from each table of values to the corresponding table of quantities and vice versa. Where values only are given, it is because the official returns do not specify the quantity. An index to the articles covered by the tables is printed on pages 223-227. In the arrangement of the tables those relating to animal matter come first, followed by those relating to vegetable matter. The tables are as follows:

Value of the agricultural imports of the United Kingdom (animal matter), by articles and countries, during the five calendar years 1896-1900. (a)

CATTLE. (b)

Countries from which imported.	Annual average, 1896-1900.	Calendar years.					Per ct. in 1900.
		1896.	1897.	1898.	1899.	1900.	
FOREIGN COUNTRIES.							
	<i>Dollars.</i>	<i>Dollars.</i>	<i>Dollars.</i>	<i>Dollars.</i>	<i>Dollars.</i>	<i>Dollars.</i>

Total British possessions...	8,755,474	7,983,858	10,104,105	8,806,151	7,928,492	8,954,764	20.42
Total.....	45,501,923	45,283,050	50,908,437	45,744,093	41,716,193	43,857,842	100.00

a As the subdivision of certain articles in the British import returns seemed to be carried out too minutely for the general purposes of the present report, it was thought best in showing the imports of these articles by countries to consolidate the separate items into which each article is divided, and thus bring the articles into closer conformity with the corresponding items published in the United States trade returns. The articles treated in this manner are as follows: Cattle; horses; hides; malt liquors; brandy; gin; rum; imitation rum; distilled spirits, n. e. s., not sweetened or mixed; distilled spirits, sweetened or mixed (tested); liqueurs, cordials, etc. (not tested); distilled spirits, perfumed; refined sugar; tea; tobacco; and champagne and other sparkling wines.

For the following items no statistics are available as to the countries of origin, the British returns showing only the totals of importation: Albumen; egg yolks and liquid eggs; greaves; silk worm gut; dextrin; kapok; flowers, everlasting; grass and moss; husks and bran for packing; and teasels.

For the following items no statistics are available as to the countries of origin prior to 1900: Glue, size, and gelatin; glue stock; sausage casings; piassava and other vegetable fibers for brush making; and fruit juices.

b For quantities, see page 146.

c Including in 1896 cows from Norway valued at \$316.

d Including in 1896 oxen and bulls from Queensland valued at \$1,567.

OUR FOREIGN TRADE

IN

AGRICULTURAL PRODUCTS,

1892-1901.

BY

FRANK H. HITCHCOCK,

Chief, Section of Foreign Markets.

WASHINGTON:
GOVERNMENT PRINTING OFFICE.
1902.

LETTER OF TRANSMITTAL

U. S. DEPARTMENT OF AGRICULTURE,
SECTION OF FOREIGN MARKETS,
Washington, D. C., February 28, 1902.

SIR: I have the honor to transmit herewith a statistical review of our foreign trade in agricultural products during the ten fiscal years 1892-1901, and to recommend its publication as Bulletin No. 27 of this Office.

Very respectfully,

FRANK H. HITCHCOCK,
Chief.

Hon. JAMES WILSON,
Secretary of Agriculture.

OUR FOREIGN TRADE IN AGRICULTURAL PRODUCTS, 1892-1901.

TRADE OF 1901.

During the fiscal year 1901 foreign countries purchased American farm produce to the value of \$952,000,000, these figures representing decidedly the largest agricultural exports in our history. Compared with the record for 1900 they show an increase of over \$100,000,000.

Our agricultural imports, on the other hand, disclose a considerable falling off when contrasted with the trade of the year preceding. The various products of agriculture received from foreign sources during 1901 had an aggregate value of only \$392,000,000, or \$28,000,000 less than in 1900.

In comparison with the value of our agricultural imports that of our agricultural exports shows the exceptionally large excess of \$560,000,000.

The relative importance of farm products in our export trade was considerably increased during 1901, such products comprising in that year 65.2 per cent of the merchandise sent abroad, while in 1900 they comprised only 61.6 per cent. In the case of our import trade, however, the proportion that farm products formed of the total was less in 1901 than in 1900, falling during the two years from 49.4 per cent to 47.6 per cent.

SUMMARY STATEMENT OF IMPORTS AND EXPORTS.

The extent to which the imports and exports of the United States consisted of products of agriculture, and the excess of agricultural exports over agricultural imports, during each fiscal year from 1892

8 FOREIGN TRADE IN AGRICULTURAL PRODUCTS, 1892-1901.

to 1901, inclusive, will be seen from the official¹ statistics presented in the following summary statement:

Value of imports and domestic exports of the United States, total and agricultural, and excess of agricultural exports over agricultural imports, during each fiscal year from 1892 to 1901, inclusive.

Year ended June 30—	Imports.			Domestic exports.			Excess of agricultural exports over agricultural imports.

OMISSION OF HAWAIIAN AND PORTO RICAN TRADE.

Owing to the fact that our import and export trade with Hawaii and Porto Rico was not included, as previously, in the foreign commerce returns of the United States for 1901, a comparison of the statistics for that year and the year preceding is not altogether satisfactory. To make an accurate comparison of our total agricultural imports and exports for 1901 and the year before, the 1901 figures should be increased to the extent of our trade with Hawaii and Porto Rico, but unfortunately complete statistics as to the value of the products of agriculture exchanged in that trade during 1901 are not to be had. In 1900 our agricultural imports from Hawaii and Porto Rico were valued at about \$24,000,000 and our agricultural exports to those islands at about \$5,000,000. From these figures it will be seen that the imports were decidedly more important than the exports, and yet the products received from Hawaii and Porto Rico comprised in value only about 5 per cent of our total agricultural imports.

LEADING AGRICULTURAL IMPORTS.

Named in the order of their importance, the leading items among our agricultural imports for 1901 were sugar, coffee, hides and skins, silk, vegetable fibers, fruits and nuts, tobacco, wool, tea, wines, cocoa, vegetable oils, distilled spirits, seeds, vegetables, and spices. The combined value of these 16 items amounted to about \$358,000,000, or

¹ The statistics of importation and exportation given in the present bulletin are based on the official returns of trade published annually by the Bureau of Statistics, United States Treasury Department.

more than 90 per cent of the valuation placed upon our total import trade in products of agriculture.

As certain of our agricultural imports, more particularly sugar, molasses, coffee, fruits, tobacco, and hides and skins, are received to a considerable extent from Hawaii and Porto Rico, the exclusion of statistics in reference to our trade with those islands in 1901 materially affects any comparison of such imports for that year and for 1900. In order to make an exact comparison it would be necessary to add to the figures for 1901 the quantity and value of our Hawaiian and Porto Rican purchases, but unfortunately the necessary statistics are not in all cases available.

SUGAR.

The quantity of sugar imported into the United States during 1901, exclusive of that received from Hawaii and Porto Rico, was 3,975,005,840 pounds, valued at \$90,487,800. In addition to these imports, 690,880,832 pounds, worth \$27,094,095, were furnished by Hawaii and 142,774,452 pounds, worth \$4,924,694, by Porto Rico, making our total imports of sugar from all sources decidedly larger than in 1900, although on the face of the returns the figures for 1901, because of the omission of Hawaiian and Porto Rican sugar, show an apparent falling off of 43,080,690 pounds in quantity and \$9,763,174 in value. Our imports of sugar during 1900, including receipts from Hawaii and Porto Rico, amounted to 4,018,086,530 pounds, the value being \$100,250,974. In 1901 the average import price of all sugars imported into the United States, except those from Hawaii and Porto Rico, was 2.3 cents per pound, as compared with 2.5 cents per pound in 1900.

COFFEE.

Our imports of coffee increased to a marked extent during 1901, the quantity received from all sources, except Hawaii and Porto Rico, amounting to 854,871,310 pounds, with a value of \$62,861,399. According to these figures there was a gain of 66,879,399 pounds in quantity and \$10,393,456 in value over the total receipts for 1900, which were reported at 787,991,911 pounds, worth \$52,467,943. Aside from the imports regularly recorded for 1901, 2,119,540 pounds, worth \$239,313, were received from Hawaii and 31,333 pounds, worth \$4,528, from Porto Rico, making the actual increase for that year even larger than that shown by the general returns. The average annual import price rose from 6.7 cents per pound in 1900 to 7.4 cents per pound in 1901.

HIDES AND SKINS.

In the importation of hides and skins there was a decided falling off during 1901, the returns for that year showing receipts of only 280,909,837 pounds, worth \$48,220,013, as against 345,934,778 pounds,

worth \$57,935,698, in 1900. According to these returns, which for 1901 are exclusive of Hawaii and Porto Rico, the decline in quantity amounted to 65,024,941 pounds and the decline in value to \$9,715,685. In the average annual import price of hides and skins there was an advance from 16.7 cents per pound in 1900 to 17.2 cents per pound in 1901.

Goatskins.—Of the hides and skins imported during 1901 a considerable portion consisted of goatskins, the receipts of this article amounting to 73,745,596 pounds, worth \$20,577,033. Compared with the record for 1900, when 81,998,818 pounds, valued at \$21,987,674, were imported, the figures for 1901 show a decline of 8,253,222 pounds in quantity and \$1,410,641 in value. The average annual import price of goatskins rose during the two years from 26.8 cents to 27.9 cents per pound.

Hides of cattle.—There was also a falling off in our imports of cattle hides, the record for 1901 being 129,174,624 pounds, worth \$14,647,413, as against 163,865,165 pounds, worth \$19,408,217, for 1900. In quantity there was a decrease of 34,690,541 pounds and in value one of \$4,760,804. While the average annual import price of goatskins advanced, that of cattle hides declined, dropping from 11.8 cents per pound in 1900 to 11.3 cents per pound in 1901.

SILK.

Our imports of silk fell off during 1901 to the extent of 2,668,163 pounds in quantity and \$15,278,395 in value. The receipts for that year were recorded at 10,405,555 pounds, worth \$30,051,365, while in 1900 there was a record of 13,073,718 pounds, worth \$45,329,760. A decline from \$3.47 to \$2.89 per pound in the average annual import price made the falling off in value much more marked than that in quantity.

VEGETABLE FIBERS.

Of vegetable fibers there were imports during 1901 amounting in value to \$29,720,334, or \$4,614,416 less than the figures for 1900, which were recorded at \$34,334,750. Sisal grass, Manila hemp, cotton, and jute were the principal varieties imported.

Sisal grass.—The quantity of sisal grass imported in 1901 was smaller by 6,845 tons than in the year preceding. The annual import records show a decline in the two years from 76,921 tons to 70,076 tons. Owing to a marked drop in the annual import price, which fell from \$153.17 to \$113.77 per ton, the decline in value was still more decided, the 1901 record amounting to only \$7,972,564, as against \$11,782,263 for 1900, a loss of \$3,809,699.

Manila hemp.—Our imports of Manila hemp, all of which come directly or indirectly from the Philippine Islands, showed a slight gain in quantity during the past year, but a decline in value. The amount

imported increased from 42,624 tons in 1900 to 43,735 tons in 1901, a gain of 1,111 tons, while the value of the consignments received fell from \$7,172,368 in the former year to \$7,115,446 in the latter, a decline of \$56,922. The falling off in value was due to a smaller import price, the average for 1901 being \$162.69 per ton, as compared with \$168.27 per ton for 1900.

Cotton.—In the importation of foreign cotton, most of which comes from Egypt, there was a rather marked decline, the quantity received falling from 67,398,521 pounds in 1900 to 46,631,283 pounds in 1901, while the value dropped from \$7,960,945 to \$6,787,828. The decrease in quantity amounted to 20,767,238 pounds and that in value to \$1,173,117. The annual import price per pound averaged 14.6 cents for 1901, as compared with only 11.8 cents for 1900, showing a decided advance.

Jute.—Our imports of jute, including jute butts, increased from 102,693 tons, worth \$3,956,413, in 1900 to 103,140 tons, worth \$4,412,482, in 1901. The quantity imported showed a gain of 447 tons and the value one of \$456,069. An advance from \$38.53 to \$42.78 per ton in the average annual import price contributed largely to the marked increase in value.

FRUITS AND NUTS.

Fruits and nuts were imported to the value of \$19,586,703 in 1901, as compared with \$19,263,592 in 1900, the increase amounting to \$323,111. Fruits formed the principal part of these imports, having a value of \$16,284,758 in 1900 and \$16,317,848 in 1901. The varieties imported most extensively were bananas and lemons.

Bananas.—Of bananas there were imports in 1901 worth \$6,550,186. Compared with the value for 1900, which amounted to \$5,877,835, these figures disclose a gain of \$672,351.

Lemons.—Our lemon imports in 1901 were considerably smaller than in the year preceding, showing a decline from 160,198,056 pounds to 148,514,614 pounds, while the value fell from \$3,666,881 to \$3,516,856. The falling off in quantity amounted to 11,683,442 pounds and that in value to \$150,025. The average annual import price for 1900 was 2.3 cents per pound and that for 1901 2.4 cents per pound.

TOBACCO.

Tobacco was imported during 1901 to the extent of 26,851,253 pounds, or 7,231,626 pounds in excess of the receipts for 1900, which amounted to 19,619,627 pounds. In the value of the imports there was an advance from \$13,297,223 to \$16,290,387, making a gain of \$2,993,164. The average annual import price fell during the two years from 67.8 cents to 60.7 cents per pound.

WOOL.

In the quantity of wool imported there was a decided falling off during 1901, the receipts for that year amounting to only 103,583,505

12 FOREIGN TRADE IN AGRICULTURAL PRODUCTS, 1892-1901.

pounds, as against 155,928,455 pounds for 1900. The value of the imports meanwhile fell from \$20,260,936 to \$12,529,881. The decrease in quantity amounted to 52,344,950 pounds and that in value to \$7,731,055. In the average annual import price there was a decline from 13 cents per pound in 1900 to 12.1 cents per pound in 1901.

TEA.

Our purchases of tea in 1901 amounted to 89,806,453 pounds, exceeding by 4,961,346 pounds the imports for 1900, which were recorded at 84,845,107 pounds. The total import value advanced during the two years from \$10,558,110 to \$11,017,876, a gain of \$459,766. In 1901 the import price averaged 12.3 cents per pound, as compared with 12.4 cents per pound in 1900.

WINES.

The wines imported into the United States during 1901 had a total value of \$8,219,236. This sum was \$797,741 larger than the value recorded for 1900, which amounted to \$7,421,495.

COCOA.

Of cocoa we imported during 1901 46,901,356 pounds, worth \$6,761,669, as compared with only 42,759,240 pounds, worth \$5,970,844, during 1900. There was an increase of 4,142,116 pounds in the size of the imports and one of \$790,825 in their value. The average annual import price advanced from 14 cents to 14.4 cents a pound.

VEGETABLE OILS.

Our imports of vegetable oils for 1901 were valued at \$6,647,858. In comparison with the value for 1900, which amounted to \$6,320,711, these figures show a gain of \$327,147.

DISTILLED SPIRITS.

The amount of distilled spirits imported rose during 1901 to 2,877,556 proof gallons, outstripping by 395,536 proof gallons the importations of the year before, which were recorded at 2,482,020 proof gallons. In value the imports increased \$552,318, advancing during the two years from \$3,609,831 to \$4,162,149. The annual import price averaged the same in 1901 as in the year before, amounting to \$1.45 per proof gallon.

SEEDS.

Our imports of seeds showed a marked increase in 1901, reaching a value of \$4,039,194, while the value recorded for 1900 was only \$1,795,048. There was a gain of \$2,244,146.

VEGETABLES.

Vegetables were imported during 1901 to the value of \$3,719,679, or \$784,602 in excess of the record for 1900, which amounted to \$2,935,077.

SPICES.

Of spices, 35,211,737 pounds were imported in 1901, the value being \$3,563,109. As compared with the figures for 1900, when 38,845,615 pounds, worth \$3,401,265, were imported, there was a decrease of 3,633,878 pounds in quantity and a gain of \$161,844 in value. The larger value is accounted for by a marked advance in the average annual import price, which rose during the two years from 8.8 cents to 10.1 cents per pound.

TABLE OF LEADING AGRICULTURAL IMPORTS.

Below is a table showing, in the order of their importance, the various agricultural imports for 1901 having a valuation in excess of \$1,000,000, together with statistics as to the quantity and value of each item, and the increase or decrease as compared with the records of the year preceding. There are 33 articles in the list, and of these 20 show a gain in value during 1901, while 13 show a decline. The items are as follows:

Quantity and value of the principal agricultural imports of the United States during the fiscal years 1900 and 1901, respectively, with amount of increase or decrease in 1901.

14 FOREIGN TRADE IN AGRICULTURAL PRODUCTS, 1892-1901.

LEADING AGRICULTURAL EXPORTS.

During 1901, for the first time in several years, our exports of cotton exceeded in value our exports of breadstuffs. After cotton and breadstuffs, which held the first and second places in our agricultural export trade, meat products formed the largest item. Additional exports of leading importance, named in the order of their value, were live animals, tobacco, vegetable oils, oil cake and oil-cake meal, fruits and nuts, dairy products, and seeds. The 10 items mentioned comprised in value nearly 97 per cent of our total shipments of farm produce for 1901.

Following is a table that exhibits the export value in 1900 and 1901 of each of the 10 items under consideration, and shows the amount of increase or decrease in the latter year as compared with the former:

Agricultural exports (domestic) of the United States for 1900 and 1901, arranged by leading groups, with amount of increase or decrease in 1901.

Agricultural exports.	Year ended June 30—		Increase in 1901.	Decrease in 1901.
	1900.	1901.		
	<i>Dollars.</i>	<i>Dollars.</i>	<i>Dollars.</i>	<i>Dollars.</i>
Cotton	242,988,978	315,105,047	72,116,069
Breadstuffs	262,744,078	275,594,618	12,850,540
Meat products	178,751,471	186,106,037	12,354,566
Live animals	43,585,031	52,058,876	8,473,845
Tobacco	29,422,371	27,656,475	1,765,896
Vegetable oils	16,345,056	19,035,686	2,690,630
Oil cake and oil-cake meal	16,806,302	18,723,672	1,917,370
Fruits and nuts	11,642,662	10,826,651	816,011
Dairy products	9,226,520	9,403,722	177,202
Seeds	7,036,982	6,384,815	652,167
Other	31,067,079	30,732,732	334,347
Total agricultural exports	844,616,530	951,628,331	107,011,801

In comparing the export statistics of 1900 and 1901 it should be borne in mind that the figures for the latter year, unlike those for the former, do not include our shipments to Hawaii and Porto Rico. As our agricultural exports to these islands are comparatively small, however, the omission is not so important as that made in the records of the import trade. During 1900, as has already been shown, only about \$5,000,000 worth of farm produce was sent to Hawaii and Porto Rico, that sum forming less than 1 per cent of our total agricultural exports. Complete statistics as to the value of the agricultural products shipped to these islands in 1901 are not available.

COTTON.

Owing to the high price of cotton during the past year our shipments of that product brought an unusually large return, the total export value of \$315,105,047 exceeding all prior records. The gain over the value for 1900, which was reported at \$242,988,978, amounted to \$72,116,069. In 1901 there was an average export price of 9.4 cents per pound as compared with only 7.8 cents per pound in 1900.

The increase in the quantity exported, while not so marked as the gain in value, was nevertheless considerable, the shipments advancing during the two years from 3,126,225,588 pounds to 3,359,062,360 pounds. The exports for 1901 were 232,836,772 pounds larger than those for the year preceding.

BREADSTUFFS.

During 1901 the United States sent to foreign markets breadstuffs having a total value of \$275,594,618. These figures represent the highest value recorded since the extraordinary shipments of 1898. Compared with the value for 1900, which amounted to \$262,744,078, they show a gain of \$12,850,540.

The growth of our export trade in breadstuffs for 1901 was due to increased shipments of wheat. Our exports of corn, which in 1900 had a higher value than those of wheat, showed a considerable decline during 1901. Oats, barley, and rye were also shipped less extensively in the latter year.

Wheat.—Our exports of wheat in 1901 amounted to 132,060,667 bushels, having a value of \$96,771,743. Compared with the record for 1900, when shipments amounting to 101,950,389 bushels and valued at \$73,237,080 were reported, the figures for 1901 exhibit a gain of 30,110,278 bushels in quantity and \$23,534,663 in value. The average annual export price rose during the two years from 71.8 cents to 73.3 cents per bushel.

Wheat flour.—While our exports of wheat increased to a marked extent in 1901, the quantity of wheat flour sent abroad during that year was somewhat less than in the year before. Our flour shipments declined from 18,699,194 barrels in 1900 to 18,650,979 barrels in 1901, a loss of 48,215 barrels. Owing to a decided advance in the export price, however, this decrease in quantity was accompanied by a gain of \$1,698,410 in value. The exports for 1901 were worth \$69,459,296 and those for 1900 only \$67,760,886. In the average annual export price there was an advance from \$3.62 to \$3.72 per barrel.

Converted into its equivalent in grain, the flour marketed abroad during 1901 was equal to 83,929,406 bushels of wheat, and similarly the flour exports of 1900 amounted to 84,146,373 bushels of wheat. In 1901 the combined shipments of wheat and wheat flour were equivalent to 215,990,073 bushels of grain, as compared with only 186,096,762 bushels in 1900. There was a gain in quantity of 29,893,311 bushels. The combined value of the wheat and wheat-flour exports, which amounted to \$140,997,966 for 1900 and \$166,231,039 for 1901, showed an increase of \$25,233,073.

Indian corn.—In the exportation of Indian corn the past year witnessed a considerable falling off from the record-breaking figures of 1900. The 1901 exports amounted to only 177,817,965 bushels, worth

\$82,527,983, as against 209,348,284 bushels, worth \$85,206,400, for the year before. The quantity exported showed a decline of 31,530,319 bushels, while in value there was a loss of \$2,678,417. A decided advance in the average export price, which rose during the two years from 40.7 cents to 46.4 cents per bushel, made the decrease in value much less marked than that in quantity.

Oats.—Our exports of oats in 1901 were smaller by 4,222,603 bushels than in the year before, the amount shipped dropping from 41,369,415 bushels to 37,146,812 bushels. This falling off in quantity was accompanied by a decline from \$12,504,654 to \$11,765,330 in value, making a loss of \$739,324. In the annual export price a rather marked advance occurred, the average for 1901 being 31.7 cents per bushel, as compared with only 30.2 cents per bushel for 1900.

Barley.—Contrasted with the exceptionally large exports recorded for 1900, our shipments of barley during 1901 showed a very decided falling off, the quantity exported declining from 23,661,662 bushels in the former year, to 6,293,207 bushels in the latter, while the value fell from \$11,216,694 to \$2,883,565. The decrease in quantity amounted to 17,368,455 bushels and that in value to \$8,333,129. In 1900 the annual export price averaged 47.4 cents per bushel, but in 1901 it dropped to 45.8 cents per bushel.

Rye.—Following the marked decline of our rye exports in 1900 a still further decrease occurred during 1901, the shipments of this cereal falling from 2,355,792 bushels, worth \$1,442,055, in the former year to 2,326,882 bushels, worth \$1,321,979, in the latter. In quantity there was a loss of 28,910 bushels and in value one of \$120,076. The annual export price averaged 56.8 cents for 1901, as compared with 61.2 cents for 1900.

MEAT PRODUCTS.

Measured in value, our exports of meat products during 1901 were decidedly the largest ever recorded, the shipments under this head having a total valuation of \$186,106,037. In comparison with the exceptionally high figures for 1900, amounting to \$173,751,471, there was a gain of \$12,354,566. A considerable part of the increased value was traceable to the class of exports comprised under the term hog products, this group showing for 1901 an advance of \$7,802,086 over the record for the year preceding. In 1901 our exports of hog products were valued at \$119,961,503, while in 1900 they were worth only \$112,159,417. Notwithstanding this gain in value, which is chiefly accounted for by a general advance in price, there was a considerable falling off in the quantity of hog products exported. The shipments for 1901 amounted to only 1,462,369,849 pounds, as against 1,538,024,466 pounds for 1900, a decrease of 75,654,617 pounds. A decline in the exportation of bacon contributed largely to this loss, lard being the

only other hog product that showed a falling off in quantity. The exports of hams and of salted or pickled pork, which, after lard and bacon, are the principal items under this head, both exhibited a considerable gain.

In the case of beef products, the quantity exported during 1901 was 15,173,685 pounds larger than in the year before and the value \$2,054,912 greater. The shipments for 1901 were recorded at 538,462,660 pounds, worth \$44,225,319, as compared with 523,288,975 pounds, worth \$42,170,407, for 1900. Fresh beef, which formed decidedly the largest item in this class of exports, was the principal factor in the gain.

Oleo oil was another item of considerable importance among the meat products sent to foreign markets in 1901. The shipments of this article have been growing quite rapidly during the past few years, and according to the records for 1901 a still further increase occurred.

Lard.—Of lard, 611,357,514 pounds were exported during 1901, the value being \$46,560,148. Compared with the figures for 1900, when exports amounting to 661,813,663 pounds and worth \$41,939,164 were recorded, the shipments for 1901 disclosed a falling off of 50,456,149 pounds in quantity accompanied by a gain of \$4,620,984 in value. The decided gain in value, notwithstanding a decrease in quantity, is explained by an advance from 6.3 cents to 7.6 cents per pound in the average annual import price.

Bacon.—The decline in our bacon exports was a marked one. During 1901 only 456,122,741 pounds were sent abroad, as against 512,153,729 pounds in 1900. The loss in quantity amounted to 56,030,988 pounds. In the average annual export price there was an advance during the two years from 7.6 cents to 8.2 cents per pound, and consequently the decrease in value was comparatively small, amounting to only \$1,476,889. The exports for 1900 were worth \$38,975,915 and those for 1901 \$37,499,026.

Hams.—In the exportation of hams there was an increase from 196,414,412 pounds, valued at \$20,416,367, during 1900, to 216,571,803 pounds, valued at \$22,842,778, during 1901. The shipments of the latter year were larger in quantity by 20,157,391 pounds, and in value by \$2,426,411, than those of the year before. In 1901 the export price averaged 10.5 cents per pound, as compared with 10.4 cents per pound in 1900.

Salted or pickled pork.—Salted or pickled pork was shipped in 1901 to the extent of 138,643,611 pounds, or 5,443,928 pounds in excess of the exports of the year before, which amounted to 133,199,683 pounds. The export value increased during the two years from \$8,243,797 to \$9,926,633, a gain of \$1,682,836. In the average annual export price there was an advance from 6.2 cents to 7.2 cents per pound.

Fresh beef.—Our exports of fresh beef for 1901 amounted to 351,-748,333 pounds, worth \$31,851,361, while in 1900 only 329,078,609 pounds, worth \$29,643,830, were exported. The size of the shipments was increased 22,669,724 pounds and their value \$2,207,531. A slight advance occurred in the annual export price, which averaged 9.1 cents per pound for 1901, as compared with 9 cents per pound for 1900.

Oleo oil.—During 1901 we exported 161,651,413 pounds of oleo oil, valued at \$11,846,373. Compared with the record for 1900, when 146,739,681 pounds, worth \$10,503,856, were shipped, these figures show an increase of 14,911,732 pounds in quantity and \$1,342,517 in value. The average annual export price rose during the two years from 7.2 cents to 7.3 cents per pound.

LIVE ANIMALS.

Our export trade in live stock showed a marked development during 1901, the shipments for that year reaching the exceptionally high value of \$52,058,876, or \$8,473,845 in excess of the figures for 1900, which were recorded at \$43,585,031.

Cattle.—In the exportation of cattle there was a gain of 61,932 head over the shipments of the year before, accompanied by an increase of \$6,931,827 in value. The export record for 1901 was 459,218 head, worth \$37,566,980, as compared with 397,286 head, worth \$30,635,153, for 1900. In the average annual export price there was an advance during the two years from \$77.11 to \$81.81 per head.

Horses.—According to the export returns for 1901 we shipped to foreign countries during that year 82,250 horses, their total value amounting to \$8,873,845, while the number shipped in 1900 was only 64,722, with a value of \$7,612,616. The exports for 1901 exceeded those of the year before by 17,528 in number and \$1,261,229 in value. The average annual export price dropped during the two years from \$117.62 to \$107.89 per head.

TOBACCO.

Tobacco in its unmanufactured forms, including stems and trimmings, was exported during 1901 to the value of \$27,656,475. When compared with the shipments for 1900, which were worth \$29,422,371, these figures show a falling off of \$1,765,896.

Leaf tobacco.—Of leaf tobacco, which was the principal item under this head, we exported during 1901 306,900,934 pounds, the value being \$27,475,466. The shipments for 1900, which amounted to 334,604,210 pounds and had a value of \$29,163,086, were 27,703,276 pounds larger and \$1,687,620 more valuable than those of the succeeding year. The export price of leaf tobacco averaged 8.7 cents per pound for 1900 and 9 cents per pound for 1901.

VEGETABLE OILS.

In the exportation of vegetable oils an important gain was made during 1901, the shipments for that year reaching a total value of \$19,035,686. The increase over the figures for 1900, when exports worth \$16,345,056 were recorded, amounted to \$2,690,630.

Cotton-seed oil.—Cotton-seed oil contributed largely to the increase, the exports of this product for 1901 having a value of \$16,541,321, and amounting in quantity to 49,356,741 gallons, whereas the shipments for 1900 were recorded at only 46,902,390 gallons, worth \$14,127,538. The gain in quantity amounted to 2,454,351 gallons and that in value to \$2,413,783. There was a considerable advance in the export price, the average for 1901 being 33.5 cents per gallon, as compared with 30.1 cents per gallon for 1900.

OIL CAKE AND OIL-CAKE MEAL.

Our exports of oil cake and oil-cake meal during 1901 were the largest on record, amounting to 1,726,545,386 pounds. Compared with the exports for 1900, which were recorded at 1,631,723,300 pounds, being the heaviest prior to 1901, the shipments for the latter year showed a gain of 94,822,086 pounds. The value rose from \$16,806,302 in 1900 to \$18,723,672 in 1901, an increase of \$1,917,370. In the average annual export price there was an advance during the two years from 1 cent to 1.1 cents per pound.

FRUITS AND NUTS.

According to the export record for fruits and nuts there was a slight falling off in 1901 as compared with 1900, the total value of the shipments declining during the two years from \$11,642,662 to \$10,826,651, a loss of \$816,011. Fruits, which comprised the chief part of this item, were exported in 1901 to the value of \$10,607,908, while in 1900 a value of \$11,486,172 was recorded. A comparison of these figures shows a decline of \$878,264. Canned fruits and dried apples were the principal factors in this falling off. In the case of fresh apples, on the other hand, there was a considerable increase.

DAIRY PRODUCTS.

Our exports of dairy products during 1901 amounted in value to \$9,403,722, showing an increase of \$177,202 over the figures for 1900, which were recorded at \$9,226,520.

Butter.—A considerable growth occurred in the export butter trade, the shipments of this product increasing from 18,266,371 pounds, worth \$3,143,509, in 1900 to 23,243,526 pounds, worth \$4,014,905, in 1901. There was a gain of 4,977,155 pounds in quantity and \$871,396 in value. The export price averaged 17.2 cents per pound for 1900 and 17.3 cents per pound for 1901.

20 FOREIGN TRADE IN AGRICULTURAL PRODUCTS, 1892-1901.

Cheese.—Accompanying the increased shipments of butter there was a decline in the exportation of cheese. The quantity of cheese sent abroad in 1901 was only 39,813,517 pounds, as against 48,419,353 pounds in 1900, a falling off of 8,605,836 pounds. In value the exports declined during the two years from \$4,943,609 to \$3,950,999, a loss of \$992,610. The average annual export price dropped from 10.2 cents to 9.9 cents per pound.

SEEDS.

In the exportation of seeds from the United States there was a considerable falling off during 1901, the value of the shipments for that year amounting to only \$6,384,815, or \$652,167 less than the value for 1900, which was recorded at \$7,036,982. While the exports of cotton seed and of flaxseed increased somewhat in value during the two years, the gains in these items were more than offset by a decided falling off in the shipments of grass seed.

TABLE OF LEADING AGRICULTURAL EXPORTS.

The table given below enumerates in the order of their importance such of our agricultural exports for 1901 as had a valuation exceeding \$1,000,000, and shows the quantity and value exported in that year and in the year before, together with the amount of increase or decrease. Of the 49 items covered by the table 30 show an increase during 1901 while 19 show a decrease. The table is as follows:

Quantity and value of the principal agricultural exports (domestic) of the United States during the fiscal years 1900 and 1901, respectively, with amount of increase or decrease in 1901.

Articles exported.	Year ended June 30—				Increase (+) or decrease (—) in 1901.

AGRICULTURAL IMPORTS AND EXPORTS CLASSIFIED AS ANIMAL MATTER AND VEGETABLE MATTER.

As a convenient basis of classification the various articles comprising our agricultural imports and exports may be grouped under two general heads, animal matter and vegetable matter.

22 FOREIGN TRADE IN AGRICULTURAL PRODUCTS, 1892-1901.

AGRICULTURAL IMPORTS.

The relative standing of these two categories in our agricultural imports during each fiscal year from 1892 to 1901, inclusive, is shown by the following statement:

Agricultural imports of the United States during the fiscal years 1892 to 1901, inclusive, classified as animal matter and vegetable matter.

Year ended June 30—	Agricultural imports.				
	Total.	Animal matter.		Vegetable matter.	
		Value.	Per cent of total.	Value.	Per cent of total.
	<i>Dollars.</i>	<i>Dollars.</i>		<i>Dollars.</i>	
1892.....	436,697,067	86,198,606	19.7	350,508,462	80.3
1893.....	425,657,448	96,301,166	22.4	330,356,282	77.6
1894.....	365,160,319	48,928,085	13.4	316,232,234	86.6
1895.....	373,115,985	87,064,990	23.3	286,060,995	76.7
1896.....	391,029,407	104,118,490	26.6	286,910,917	73.4

AGRICULTURAL IMPORTS AND EXPORTS IN DETAIL.

A detailed statement of the agricultural imports¹ and exports of the United States during each fiscal year from 1892 to 1901, inclusive, embracing all such commodities as may be reasonably classed in the agricultural category, is presented in the following tables:

¹In comparing the yearly import returns for 1892-1901, tariff changes should be taken into account. The tariff of 1890, which became law on October 6 of that year, remained in effect until August 27, 1894, when it was superseded by the tariff law of 1894. The latter law continued in force until July 24, 1897, at which date the present tariff became operative.

Agricultural imports of the United States during the five years ended June 30, 1896.

LETTER OF TRANSMITTAL

U. S. DEPARTMENT OF AGRICULTURE,
SECTION OF FOREIGN MARKETS,
Washington, D. C., March 14, 1902.

SIR: I have the honor to transmit herewith a statistical report showing the sources of the agricultural imports of the United States during the five fiscal years 1897-1901, and to recommend its publication as Bulletin No. 28 of this Office.

Very respectfully,

FRANK H. HITCHCOCK,
Chief.

Hon. JAMES WILSON,
Secretary of Agriculture.

Introduction	11
Agricultural imports, by countries.....	11
Summary statement, by countries, of total agricultural imports.....	13
Agricultural imports from island dependencies:	
Hawaii	15
Porto Rico.....	16
Philippine Islands	17
Agricultural imports, by continents.....	18
Agricultural imports, by principal articles:	
Sugar	19
Coffee	20
Hides and skins.....	20
Silk	20
Vegetable fibers.....	21
Fruits and nuts.....	21
Tobacco	21
Wool	21
Tea	22
Wines.....	22
Cocoa	22
Vegetable oils.....	22
Sources of agricultural imports, in detail	23
Value of agricultural imports:	
Animal matter	23
Cattle	23
Horses	23
Sheep	24
Animals not elsewhere specified, including fowls	24
Live animals (total)	25
Beeswax.....	25
Bones, hoofs, and horns	26
Crude bristles.....	27
Bristles, sorted, bunched, or prepared	27
Butter.....	27
Cheese	28
Milk	28
Eggs	28
Egg yolks.....	29
Crude feathers and downs	29
Silk cocoons	30
Silk, raw, or as reeled from the cocoon.....	30
Silk waste.....	30
Silk (total)	30
Wool, class 1, clothing.....	31
Wool, class 2, combing.....	31
Wool, class 3, carpet.....	32
Wools (total)	32
Gelatin.....	33
Glue	33
Grease.....	34
Gut	34
Hair	34
Hide cuttings and other glue stock	35

Value of agricultural imports—Continued.

SOURCES OF THE AGRICULTURAL IMPORTS OF THE UNITED STATES, 1897-1901.

INTRODUCTION.

The purpose of the present bulletin is to bring down to date the statistics published a year ago in a similar report^a covering the five-year period 1896-1900.

AGRICULTURAL IMPORTS, BY COUNTRIES.

The foreign sources from which agricultural products are annually imported into the United States to meet requirements not supplied by domestic production include practically every quarter of the globe. Our agricultural imports during the fiscal year 1901 had a total value of \$392,000,000. The countries that contributed most extensively to these imports were Brazil, Cuba, the United Kingdom, Germany, Japan, France, the Dutch East Indies, the British East Indies, Italy, the Chinese Empire, Mexico, the British West Indies, and the Netherlands. From each of the countries named we imported products of agriculture aggregating in value over \$10,000,000.

Among the foremost countries Brazil was decidedly in the lead, sending to our markets in 1901 \$53,000,000 worth of agricultural produce. Coffee was of course the principal factor in our trade with Brazil. Sugar, hides and skins, and cocoa were also leading items among the agricultural imports from that country.

Cuba ranked second only to Brazil among the sources of our agricultural imports in 1901. Our trade with that island has shown a remarkable growth during the last few years. In 1898 the value of the agricultural produce received from Cuba fell as low as \$13,000,000. In 1899 it increased to \$22,000,000 and in 1900 to \$27,000,000. The year 1901 witnessed a still further growth, showing a value of \$39,000,000, or nearly \$12,000,000 more than the record of the year before. Sugar was of prime importance among the agricultural products brought from Cuba. Tobacco, molasses, fruits and nuts, and cocoa also figured largely in the trade.

^aBulletin No. 24, Sources of the Agricultural Imports of the United States, 1896-1900.

According to the official returns of importation for 1901 the United Kingdom occupied third place among the sources from which products of foreign agriculture were purchased. The consignments recorded as coming from the United Kingdom amounted in value to \$30,000,000. They undoubtedly consisted in large part of the produce of other countries that was reshipped from the United Kingdom as a distributing center. Chief among these products were such articles as East Indian hides and skins, Australian wools, Manila hemp, Egyptian cotton, and the like.

Germany stood fourth among the sources from which agricultural imports were received during 1901, the value of the produce purchased from that country amounting to \$28,000,000. Beet sugar was decidedly the most important item. Hides and skins, wines, rice, hops, bristles, hair, coffee, and indigo ranked high among the other articles shipped to the United States from German ports. Some of the products received from Germany, like those coming from the United Kingdom, consisted of reexported merchandise derived originally from other sources. Among the products mentioned, rice, coffee, and indigo were notable examples of such reexports.

From Japan \$21,000,000 worth of agricultural products was received in 1901, giving that country fifth place among the sources of trade. Raw silk formed the principal part of these imports, the residue consisting largely of tea and rice.

France came next in importance among the sources of our imports, contributing agricultural produce to the value of \$20,000,000. The principal articles procured from France were wines, hides and skins, silk, fruits and nuts, argols, and vegetable oils.

Agricultural imports to the value of \$19,000,000 were received from the Dutch East Indies. Cane sugar formed a large part of these imports. Coffee was an item of considerable importance, as were also goatskins and spices.

The British East Indies contributed products of agriculture worth \$17,000,000. Hides and skins, jute, spices, indigo, coffee, and tea were the principal articles.

Our agricultural imports from Italy in 1901 were also valued at \$17,000,000. They consisted chiefly of silk, lemons, argols, cheese, olive oil, and hemp.

The Chinese Empire sent us agricultural produce to the value of \$16,000,000. Silk and tea were the great items. Other products furnished quite extensively by China were hides and skins, opium, wool, and rice.

From the neighboring country of Mexico we imported products of agriculture worth \$15,000,000. Sisal grass, hides and skins, coffee, cattle, and vanilla beans were the leading items.

The British West Indies contributed agricultural imports to the value of \$11,000,000. Cane sugar was the principal item. Other products received to a considerable extent from that source were bananas, cocoa, oranges, spices, coffee, and cocoanuts.

Our agricultural imports from the Netherlands in 1901 had a value of \$10,000,000. They consisted largely of products obtained originally from other countries and reshipped from Dutch ports, such as Sumatra tobacco, spices, and cocoa.

The only other countries in 1901 that contributed produce worth above \$5,000,000 to the agricultural import trade of the United States, with the value recorded in each instance, were as follows: Canada, \$8,904,000; Argentina, \$7,684,000; Egypt, \$6,968,000; Venezuela, \$6,425,000; and Austria-Hungary, \$5,236,000.

The sources from which agricultural imports were received to a smaller extent comprised a long list of countries not one of which furnished as much as 2 per cent of the total.

SUMMARY STATEMENT, BY COUNTRIES, OF TOTAL AGRICULTURAL IMPORTS.

In the following summary statement official^a statistics are presented as to the value of the agricultural products imported into the United States from the various countries of supply during each year from 1897 to 1901, inclusive:

Value of the agricultural products imported into the United States from the several countries of shipment during each fiscal year from 1897 to 1901, inclusive.

Countries from which imported.	Annual average, 1897-1901.	Year ended June 30—					Per centin 1901.

d From Hawaii, \$27,637,216, and from Porto Rico, \$5,475,222.

AGRICULTURAL IMPORTS FROM ISLAND DEPENDENCIES.

The official import returns for 1901, from which the statistics presented in the foregoing table were compiled, did not include, as in preceding years, any figures as to the importation from Hawaii and Porto Rico, a fact that should be taken into consideration in comparing the returns of that year with previous records. In 1901 our agricultural imports from Hawaii were valued at \$28,000,000, and our agricultural imports from Porto Rico at \$5,475,000. To make the total value of our agricultural imports for 1901 properly comparable with similar returns for earlier years it should be increased by these amounts. The imports from Hawaii and Porto Rico were excluded from the general returns of importation for 1901 on the theory that these island dependencies are now integral parts of the United States.

HAWAII.

Our agricultural imports from Hawaii in 1901 consisted principally of sugar. The amount of this product shipped from the islands to American ports during the year mentioned was 691,000,000 pounds, worth \$27,000,000. Aside from sugar, the most important article of shipment was coffee, 2,120,000 pounds of which were sent to the United States, the value being \$239,000. Other agricultural products shipped in considerable quantities from Hawaii to the United States were wool, hides and skins, fruits, and rice. The shipments of wool amounted to 726,000 pounds, worth \$100,000. Of hides and skins there were consignments amounting to 1,364,000 pounds, valued at \$77,000. The fruit shipments were valued at \$75,000. Rice formed an item of \$23,000, the quantity shipped being 549,000 pounds.

Following is a table that shows in detail the quantity and value of agricultural products shipped from Hawaii to the United States during 1901, as reported to the Treasury Department by the customs officials in Hawaii:

Shipments of agricultural products from Hawaii to the United States during the year ended June 30, 1901.

Articles shipped.	Quantity.	Value.	Articles shipped.	Quantity.	Value.

^a Presumably consisting partly of vegetable oils.

^b Presumably consisting chiefly of champagne and other sparkling wines.

PORTO RICO.

In the trade of Porto Rico, as in that of Hawaii just described, sugar is the principal article of shipment to the United States. Our imports of Porto Rican sugar in 1901 amounted to 143,000,000 pounds, and had a value of \$4,925,000. In addition to the sugar imports 1,141,000 gallons of molasses were purchased from Porto Rico, the value being \$248,000. After sugar and molasses the largest item in our agricultural import trade with Porto Rico was tobacco, of which product 665,000 pounds, worth \$158,000, were received. Fruits formed another item of considerable importance in the trade, the import value amounting to \$87,000. Oranges and lemons were the fruits imported most extensively. The imports of oranges in 1901 amounted to 4,790,000 pounds, with a value of \$61,000, while of lemons 707,000 pounds, worth \$9,000, were received. Still another item of importance was that comprising hides and skins, of which 380,000 pounds were imported, the value being \$41,000. Cattle hides formed the principal part of these imports.

Detailed statistics as to the quantity and value of the agricultural products imported into the United States from Porto Rico during 1901 are presented in the following table:

Agricultural imports into the United States from Porto Rico during the year ended June 30, 1901.

PHILIPPINE ISLANDS.

Although our agricultural imports from the Philippines are still recorded in the general returns of importation and accordingly form a part of the summary statement printed on pages 13-14, it may be of interest in connection with the statistics of importation from Hawaii and Porto Rico just given to present a statement showing in like detail the agricultural features of our Philippine import trade.

The agricultural products imported into the United States from the Philippine Islands during 1901 had a value of \$4,375,000. Manila hemp was decidedly the most important item. The imports of this fiber amounted to 26,000 tons, worth \$4,254,000. Next to manila hemp the largest import was sugar, of which 4,693,000 pounds, with a value of \$104,000, were received. Among other agricultural imports from the Philippines the most important were jute, fruits and nuts, vegetable oils, and tobacco. Of jute 90 tons, having a value of \$6,000, were imported. Fruits and nuts formed an item of \$4,858, and vegetable oils one of \$4,460. The imports of tobacco amounted to 5,174 pounds and had a value of \$1,224.

In the following table detailed statistics are given as to the quantity and value of our agricultural imports from the Philippines during 1901:

Agricultural imports into the United States from the Philippine Islands during the year ended June 30, 1901.

AGRICULTURAL IMPORTS, BY CONTINENTS.

During 1901 the various countries of Europe sent to our markets products of agriculture having an aggregate value of \$127,000,000, or nearly one-third of our total agricultural imports. Although Europe thus appears to be the principal source of our import trade in agricultural produce, it is to be remembered that a considerable portion of the merchandise received from European ports came originally from countries outside of Europe. The imports recorded from Europe consist quite largely of articles produced in other regions, and especially in the tropical possessions of certain European countries, from which they are finally distributed in the form of reexports.

Next to Europe, North America was the continent from which the agricultural imports of the United States in 1901 were most extensively supplied. The products of agriculture procured from countries

on this continent and from adjacent islands amounted in value to \$89,000,000, forming 23 per cent of the total.

South America contributed about 21 per cent, sending us products of agriculture to the value of \$83,000,000.

From Asia we purchased agricultural produce worth \$77,000,000, or about 20 per cent of the total.

Oceania and Africa each contributed a trifle over 2 per cent. The agricultural produce received from Oceania had a value of \$8,358,000, while from Africa there were imports worth \$8,227,000.

The following table shows the value of the agricultural products imported into the United States from the several continents during each of the five years 1897-1901:

Value of the agricultural products imported into the United States from the several continents during each fiscal year from 1897 to 1901, inclusive.

Continents from which imported.	Annual average, 1897-1901.	Year ended June 30—					Per cent in 1901.

^a The apparently marked decrease is due to the exclusion of imports from Hawaii.

AGRICULTURAL IMPORTS, BY PRINCIPAL ARTICLES.

As regards value, the leading items in our agricultural import trade for 1901 ranked in the following order: Sugar, coffee, hides and skins, silk, vegetable fibers, fruits and nuts, tobacco, wool, tea, wines, cocoa, and vegetable oils. Each of the twelve items mentioned had a value in excess of \$5,000,000, while the remaining articles of importation all fell below that amount.

SUGAR.

During 1901 the United States imported \$90,000,000 worth of sugar. Over a quarter of this sugar was contributed by Cuba, from which island imports having a value of \$26,000,000 were received. Next to Cuba the Dutch East Indies were the principal source of supply, furnishing \$17,000,000 worth. From Germany, which contributes the principal part of the beet sugar shipped to the United States, there were imports valued at \$16,000,000. Brazil supplied unusually large consignments of sugar in 1901, the value amounting to \$5,348,000. Our imports from the British West Indies in that year were valued at \$5,059,000. British Guiana sent shipments worth \$1,803,000. From Austria-Hungary, which is another important beet-sugar country, we purchased \$3,727,000 worth. The only other countries that

supplied imports valued above \$1,000,000 were Santo Domingo, Peru, Belgium, and Egypt. The shipments received from Santo Domingo were worth \$2,959,000, and those from Peru \$2,702,000. From Belgium sugar was imported to the value of \$1,725,000, and from Egypt to the value of \$1,654,000.

COFFEE.

Our coffee imports for 1901 amounted in value to \$63,000,000. Over two-thirds of these imports came from Brazil, that country sending shipments worth \$45,000,000. After Brazil the largest contributors to our coffee trade in the year mentioned were Venezuela and Guatemala. The imports from Venezuela were valued at \$4,639,000 and those from Guatemala \$3,186,000. The shipments received from Mexico were unusually small, having a value of only \$1,960,000. Costa Rica, the Dutch East Indies, and Colombia were the only other sources of importation sending shipments worth more than \$1,000,000. The value of the imports from Costa Rica was \$1,511,000; from the Dutch East Indies \$1,360,000; and from Colombia \$1,192,000.

HIDES AND SKINS.

Of hides and skins the United States imported \$48,000,000 worth in 1901. The principal sources of supply were the British East Indies, the United Kingdom, France, Argentina, and Germany. From the British East Indies there were imports amounting in value to \$8,333,000. The United Kingdom, which is an important distributing center for the produce of other countries, and especially of the British colonial possessions, forwarded to the United States hides and skins valued at \$5,538,000. France sent consignments worth \$4,386,000. From Argentina hides and skins were imported to the value of \$4,146,000. Our imports from Germany were valued at \$3,656,000. After the countries mentioned the most important sources of supply were Mexico, Brazil, and European Russia. From Mexico there were imports worth \$2,668,000; from Brazil, \$2,062,000; and from European Russia, \$2,008,000. Other sources that contributed imports exceeding \$1,000,000 in value were Venezuela, Canada, Uruguay, the Chinese Empire, and Aden.

SILK.

In the importation of silk during 1901 the United States expended \$30,000,000. Japan received nearly half of this sum, the imports from that country having a value of \$15,000,000. The remainder of the silk imported came largely from Italy and China. The silk received from Italy was valued at \$7,182,000, while the Chinese Empire contributed shipments worth \$6,366,000. France, which was the only other country furnishing consignments in excess of \$1,000,000, supplied imports to the value of \$1,710,000.

VEGETABLE FIBERS.

Our imports of vegetable fibers during 1901 amounted in value to nearly \$30,000,000. They came chiefly from Mexico, Egypt, the United Kingdom, the Philippine Islands, and the British East Indies. The imports from Mexico had a value of \$8,136,000. From Egypt imports worth \$5,205,000 were received. The United Kingdom forwarded shipments to the value of \$5,013,000. Our imports from the Philippine Islands, consisting chiefly of manila hemp, were valued at \$4,260,000. The British East Indies sent consignments worth \$4,178,000. None of the remaining sources of supply furnished imports worth \$1,000,000.

FRUITS AND NUTS.

The fruits and nuts imported into the United States during 1901 cost about \$20,000,000. From Italy, which contributed larger imports than any other country, consignments worth \$4,170,000 were received. Next to Italy the British West Indies were the most important source of supply, furnishing shipments to the value of \$3,431,000. Other countries of leading importance in the trade were Spain, France, Costa Rica, and Honduras. Spain contributed \$1,870,000 worth, and France \$1,521,000 worth. The imports from Costa Rica were valued at \$1,297,000, and the imports from Honduras at \$1,070,000.

TOBACCO.

Our tobacco imports in 1901 were considerably larger than for several years, having a value of \$16,000,000. The increase occurred chiefly in our purchases from Cuba, which were exceptionally heavy during the past year. The consignments received from that island were valued at \$9,835,000, forming 60 per cent of our total imports. Aside from Cuba the Netherlands formed the principal source of importation. The shipments received from Dutch ports, consisting principally of Sumatra tobacco, had a value of \$5,609,000.

WOOL.

The value of the wool imported into the United States during 1901 was \$13,000,000. From the United Kingdom, which was the principal source of importation, consignments were received having a value of \$5,321,000. These consignments undoubtedly consisted in large part of wool imported into the British market from other sources, and especially from Australasia. The shipments of wool sent direct from British Australasia to the United States amounted in value to \$2,045,000. European Russia was one of the important sources of supply, sending consignments worth \$1,291,000. Another country that contributed quite extensively to our foreign wool supply was Argentina, from which source imports worth \$1,179,000 were received.

TEA

Our tea imports for 1901 cost \$11,000,000. They came chiefly from Japan and China. The importations received from Japan had a value of \$4,966,000, while from the Chinese Empire consignments worth \$4,864,000 were imported.

WINES.

During 1901 we expended over \$8,000,000 in the importation of wines. France was the principal contributor, the shipments received from that country having a value of \$5,214,000. Next to France the most important source of supply was Germany, from which country consignments worth \$1,249,000 were received. Of the remaining sources of importation, Spain and Italy sent the largest shipments.

COCOA.

Our imports of cocoa during 1901 were valued at \$6,762,000. This product was imported most extensively from the British West Indies, the shipments received from that source having a value of \$2,011,000. Of the remaining sources of supply Dutch Guiana, Brazil, and Ecuador were the most important.

VEGETABLE OILS.

Vegetable oils were imported during 1901 to the value of \$6,648,000. They came in largest quantities from the United Kingdom, Italy, and France. The vegetable oils imported from the United Kingdom had a value of \$1,560,000 and were probably to a considerable extent reexports. From Italy imports worth \$1,410,000 were received. France contributed shipments having a value of \$1,219,000.

Following is a table that shows the value of the twelve leading items in our agricultural import trade for each of the five years 1897-1901:

Value of the agricultural imports of the United States, by principal articles and groups, during each fiscal year from 1897 to 1901, inclusive.

Agricultural imports.	Annual average, 1897-1901.	Year ended June 30—					Per centin 1901.

SOURCES OF AGRICULTURAL IMPORTS, IN DETAIL.

The tables presented on the following pages embrace all the agricultural imports of the United States during the five fiscal years 1897-1901, exhibiting for each article the extent of the annual importations received from the various sources of supply. For convenience in classification, the articles are divided into two groups, consisting, respectively, of animal matter and vegetable matter. The tables are arranged in two series, the first relating to the value and the second to the quantity of the articles imported. To facilitate comparison, cross references are given from each table of values to the corresponding table of quantities, and vice versa. In some cases, however, values only are given, no returns being made as to quantity. An index to the articles covered by the tables is printed on pages 129-132. The tables are as follows:

Value of the agricultural imports of the United States (animal matter), by articles and countries, during the five fiscal years 1897-1901.

a Exclusive of tallow (free of duty) prior to July 24, 1897. In 1899 and 1900, including "Tallow under reciprocity treaty with Hawaii (free)," of which there were imports valued at \$5,196 in 1899, and \$437 in 1900. The returns of exportation from Hawaii to the United States for 1901 include under the head of provisions an item of \$1,322, a large part of which was presumably tallow.

b Annual average, 1900-1901.

c Included under Chinese Empire.

d Annual average, 1897-1900.

e Not stated.

f From Porto Rico, \$177.

g For quantity, see page 99.

U. S. DEPARTMENT OF AGRICULTURE.

SECTION OF FOREIGN MARKETS.—BULLETIN No. 29.

DISTRIBUTION
OF THE
AGRICULTURAL EXPORTS
OF THE
UNITED STATES,
1897-1901.

BY

FRANK H. HITCHCOCK,
Chief, Section of Foreign Markets.

WASHINGTON:
GOVERNMENT PRINTING OFFICE.
1902.

LETTER OF TRANSMITTAL.

U. S. DEPARTMENT OF AGRICULTURE,
SECTION OF FOREIGN MARKETS,
Washington, D. C., April 2, 1902.

SIR: I have the honor to transmit herewith a statistical report showing the distribution of the agricultural exports of the United States during the five fiscal years 1897-1901, and to recommend its publication as Bulletin No. 29 of this Office.

Very respectfully,

FRANK H. HITCHCOCK,
Chief.

Hon. JAMES WILSON,
Secretary of Agriculture.

CONTENTS.

	Page.
Introduction	11

DISTRIBUTION OF THE AGRICULTURAL EXPORTS OF THE UNITED STATES, 1897-1901.

INTRODUCTION.

The present bulletin has been prepared for the purpose of bringing down to date statistics published a year ago in a similar report¹ covering the five-year period 1896-1900.

AGRICULTURAL EXPORTS, BY COUNTRIES.

Of the \$952,000,000 worth of farm produce shipped from the United States during the fiscal year 1901, more than half was disposed of in the British market. Our agricultural exports to that destination in the year mentioned had the exceptionally high value of \$496,000,000. Cotton was decidedly the largest factor in the trade. Aside from cotton the most important articles of shipment were wheat and wheat flour. Another grain sent to the United Kingdom in large quantities was indian corn, which ranked fourth among the exports for 1901. Live cattle formed the fifth item in point of value, followed, in the order named, by fresh beef, bacon, hams, and lard. The only additional articles having a value in excess of \$5,000,000 were tobacco and oats.

After the United Kingdom, the foreign countries affording the largest markets for products of American agriculture in 1901 were Germany, the Netherlands, France, Belgium, Canada, Italy, Denmark, Spain, British Africa, and Cuba.

Our agricultural exports to Germany in that year, like our agricultural exports to the United Kingdom, were unusually large, having a value of \$145,000,000. In the case of Germany also, the leading farm product purchased from the United States during 1901 was cotton. Next to cotton, indian corn formed the largest item. Other articles of considerable importance, named in the order of their value, were lard, wheat, oil cake, tobacco, oleo oil, and wheat flour.

To the Netherlands we sold in 1901 \$51,000,000 worth of agricultural products. Wheat and corn were the principal exports to that

¹ Bulletin No. 25, Distribution of the Agricultural Exports of the United States, 1896-1900.

country. Oleo oil also formed an important item in the Dutch trade. Other articles shipped quite extensively were wheat flour, lard, cotton-seed oil, oil cake, and cotton.

The American farm produce sent to France during 1901 had a value of \$50,000,000, or slightly less than that sent to the Netherlands. In our agricultural exports to France cotton was of far greater value than all other products combined. Aside from cotton the principal articles of shipment to that destination were cotton-seed oil, tobacco, corn, oats, and lard.

Belgium furnished a market in 1901 for \$35,000,000 worth of our agricultural exports. Wheat, cotton, and corn formed the largest items. Lard was also an article of leading importance. Other products of agriculture shipped to Belgium in considerable abundance were oil cake, leaf tobacco, and bacon.

About \$28,000,000 worth of United States farm produce was marketed during 1901 in the neighboring country of Canada. Wheat, cotton, and corn were decidedly our largest exports to that destination. Another product shipped quite extensively was tobacco. Horses and cattle also formed items of considerable value. Among numerous other articles those of chief importance were flaxseed, hides and skins, pork, bacon, and hams, oats, oranges, and wheat flour.

To Italy we made shipments of agricultural produce valued at \$25,000,000. After cotton, which formed a large part of the trade, the articles marketed there most extensively were tobacco, cotton-seed oil, and wheat.

Our agricultural exports to Denmark in 1901 had a value of over \$13,000,000. Aside from indian corn, which was decidedly the foremost item, they consisted chiefly of oil cake, cotton, oleo oil, lard, wheat, and wheat flour.

The shipments of American farm produce to Spain in 1901 were unusually large, having a value of \$12,699,000. Cotton formed the bulk of the trade. Other items of some importance were tobacco, wheat, indian corn, and sausage casings.

Exceptionally heavy exports of agricultural produce were also sent to British Africa in 1901, the record for that year showing a value of \$12,637,000. These exports went chiefly to British South Africa. Horses and mules for army purposes comprised an important part of the trade. Additional products of American agriculture shipped quite extensively to British South Africa were wheat and wheat flour, corn and corn meal, canned meats, and hay.

To Cuba, which was the only other foreign country in 1901 that purchased over \$10,000,000 worth of United States farm produce, shipments were sent amounting in value to \$12,624,000. Lard, wheat flour, and cattle formed the largest items among our agricultural exports to Cuba. Other United States products marketed there

quite abundantly were indian corn, hams, pork, eggs, bacon, milk, beans and peas, and malt liquors.

In addition to the eleven countries mentioned above, to each of which we sent over \$10,000,000 worth of agricultural produce, there were several destinations of less importance that made purchases exceeding \$5,000,000, as follows: Sweden and Norway, \$7,086,000; Japan, \$6,299,000; Mexico, \$6,265,000; Hongkong, \$5,172,000; and the British West Indies, \$5,136,000.

The various countries that have thus far been named received together over nine-tenths of our agricultural exports for 1901. The remainder of the trade was distributed among numerous other destinations, none of which received shipments amounting in value to 1 per cent of the total.

SUMMARY STATEMENT, BY COUNTRIES, OF TOTAL AGRICULTURAL EXPORTS.

In the following summary statement, official¹ statistics are presented as to the value of the agricultural products exported from the United States to the various countries of destination during each year from 1897 to 1901, inclusive :

Value of the agricultural products exported from the United States to the several foreign countries during each fiscal year from 1897 to 1901, inclusive.

AGRICULTURAL EXPORTS TO ISLAND DEPENDENCIES.

While our exports to the Philippine Islands were included in the general trade returns for 1901, as will be seen by referring to the summary statement of agricultural exports printed above, our exports to Hawaii and Porto Rico were not similarly recorded. In the case of

Hawaii the usual statistics of exportation from the United States were not collected, and it is accordingly impossible to present any figures as to the agricultural products shipped to that destination in 1901. As regards our trade with Porto Rico, however, special returns were made, from which a statement of our agricultural exports to that island can be presented.

PORTO RICO.

The agricultural produce shipped from the United States to Porto Rico during 1901 amounted in value to \$3,490,000. Rice was decidedly the most important item. Of this product 37,000,000 pounds, worth \$1,310,000, were sent to the island. Next to rice, the largest export was wheat flour, the shipments of which amounted to 220,000 barrels and had a value of \$820,000. Salted or pickled pork was another leading item, and also lard. Of the former product 4,577,000 pounds, worth \$296,000, were shipped, while the exports of lard amounted to 4,086,000 pounds, with a value of \$290,000. Among the various other articles sold to the island the most important were cheese, bacon, corn meal, malt liquors, hams, and potatoes. Cheese was exported to the extent of 650,000 pounds, worth \$75,000, and bacon to the extent of 921,000 pounds, worth \$66,000. The shipments of corn meal were valued at \$62,000, amounting to about 30,000 barrels. Malt liquors formed an item of \$59,000. The exports of hams were recorded at 641,000 pounds, with a value of \$56,000. Potatoes also showed an export value of \$56,000, the quantity shipped amounting to 77,000 bushels. Additional agricultural products sent to Porto Rico in considerable quantities during 1901 were: Fresh beef, butter, beans and peas, bread and biscuit, wines, sausages, oleomargarine, canned meats, and refined sugar.

The following table gives detailed statistics as to the quantity and value of the agricultural products exported from the United States to Porto Rico during 1901:

Agricultural exports from the United States to Porto Rico during the year ended June 30, 1901.

PHILIPPINE ISLANDS.

The value of the agricultural produce shipped from the United States to the Philippine Islands in 1901 was \$2,500,000. Leading articles of exportation, named in the order of their value, were malt liquors, oats, hay, distilled spirits, potatoes, mules, and horses.

Of malt liquors 618,000 dozen quarts were sent to the islands, the value being \$762,000. Oats were exported to the extent of 1,258,000 bushels, worth \$546,000, and hay to the extent of 17,000 tons, worth \$324,000. Distilled spirits formed an item of \$316,000, the quantity being 167,000 proof gallons. Of potatoes there were exports amounting to 209,000 bushels, with a value of \$131,000. The number of mules shipped was 1,175, valued at \$118,000, while the horses numbered 1,578 and had a value of \$115,000. Among the various other products of agriculture marketed in the Philippines during 1901 the most important were onions, wines, wheat flour, milk, fruits, and malt.

Following is a statement that shows in detail the quantity and value of the agricultural products exported from the United States to the Philippine Islands during 1901:

Agricultural exports from the United States to the Philippine Islands during the year ended June 30, 1901.

AGRICULTURAL EXPORTS, BY CONTINENTS.

Nearly nine-tenths of the agricultural produce exported from the United States during 1901 found a market in Europe. The aggregate value of the products of American agriculture shipped to the various countries of that continent during the year mentioned was \$847,000,000. These figures are far in excess of any previously recorded. Compared with similar statistics for 1900 they show a gain of over \$100,000,000. They make it clear that the recent growth of our agricultural export trade has occurred chiefly in the business done with European countries.

Aside from our European trade the most important foreign markets for domestic farm produce were those afforded by the neighboring countries of North America. The agricultural products shipped from the United States to North American destinations had a value of \$60,000,000.

Our agricultural exports to Africa in 1901 were unusually large for that continent, having a value of nearly \$15,000,000. This was a gain of about \$3,000,000 over the returns for 1900.

In our trade with Asia, on the other hand, a considerable decline occurred during 1901, the record for that year falling to about \$14,000,000, or more than \$8,000,000 less than in 1900.

The agricultural exports of the United States to South America in 1901 were valued at about \$11,000,000. They showed an increase of nearly \$2,000,000 over the figures of the preceding year.

In the case of Oceania, also, the official returns for 1901 would doubtless have shown an increased exportation were it not for the omission of the shipments to Hawaii. With the exclusion of the products sent to Hawaii our agricultural exports to Oceania in that year had a value of \$4,600,000.

The value of the agricultural products exported from the United States to the several continents during each of the five years 1897-1901 will be seen from the statistics presented in the following table:

Value of the agricultural products exported from the United States to the several continents during each fiscal year from 1897 to 1901, inclusive.

AGRICULTURAL EXPORTS, BY PRINCIPAL GROUPS.

In respect to value, the ten leading groups of produce in our agricultural export trade for 1901 ranked in the following order: Cotton, breadstuffs, meat products, live animals, tobacco, vegetable oils, oil cake and oil-cake meal, fruits and nuts, dairy products, and seeds.

Statistics showing the value of these leading items for each of the five years 1897-1901 are presented in the following table:

Value of the agricultural exports of the United States, by leading groups, during each fiscal year from 1897 to 1901, inclusive.

COTTON.

Cotton was by far the most important of our agricultural exports in 1901. The shipments of this product had an aggregate value of \$315,000,000. Nearly half of the cotton sent abroad during the year mentioned found a market in the United Kingdom, that country receiving consignments worth \$147,000,000. Germany, which ranked next to the United Kingdom as a consumer of American cotton, made purchases amounting to \$77,000,000. France stood third among our foreign markets, buying \$35,000,000 worth. To Italy, which occupied fourth place, we sold cotton to the extent of \$17,000,000. Spain ranked fifth among the purchasing countries, the shipments to that destination having a value of about \$11,000,000.

After the five countries mentioned, which together took about 90 per cent of the cotton exported from the United States during 1901, the principal foreign markets for this product were Belgium, Canada, Japan, European Russia, and the Netherlands. The shipments to Belgium were valued at \$7,408,000. Canada made purchases to the extent of \$5,127,000. In the case of Japan our sales were smaller than for several years, amounting to only \$4,086,000. To European Russia we sold \$2,499,000 worth, and to the Netherlands, \$2,466,000 worth.

The only other countries that took exports of cotton worth over \$1,000,000, with the values recorded in each instance, were as follows: Mexico, \$1,751,000; Austria-Hungary, \$1,686,000; and Denmark, \$1,177,000.

BREADSTUFFS.

The breadstuffs shipped from the United States to foreign markets during 1901 had an aggregate value of \$276,000,000. More than half of these exports went to the United Kingdom, the consignments received by that country amounting in value to \$150,000,000. Aside from the United Kingdom the largest foreign markets in 1901 were those afforded by Germany, the Netherlands, Belgium, and Canada. To Germany we sent \$30,000,000 worth of breadstuffs, and to the Netherlands, \$23,000,000 worth. Belgium made purchases to the extent of \$15,000,000, while to Canada there were shipments valued at \$11,000,000.

Foremost among other destinations were Denmark, France, Hongkong, Cuba, Portugal, British Africa, the British West Indies, and Brazil. The exports to Denmark were valued at \$6,465,000, and those to France at \$4,498,000. Hongkong received consignments worth \$3,982,000. Cuba, which made larger purchases than for several years, took shipments worth \$3,180,000. To Portugal we sent exports having a value of \$3,119,000. In the trade with British Africa exports of breadstuffs worth \$3,050,000 were recorded. The principal part of

these exports found a market in British South Africa. To the British West Indies we sold \$2,890,000 worth, and to Brazil \$2,727,000 worth.

The only other countries that received consignments valued above \$1,000,000 were the following: Sweden and Norway, \$1,538,000; Mexico, \$1,185,000; Japan, \$1,109,000; and Portuguese Africa, \$1,040,000.

MEAT PRODUCTS.

American meat products were marketed abroad during 1901 to the value of \$186,000,000. The United Kingdom took \$118,000,000 worth, or nearly two-thirds of the total exports. After the United Kingdom, Germany and the Netherlands were our largest customers. To Germany we sold \$21,000,000 worth, and to the Netherlands \$13,000,000 worth.

Extensive sales were also made to Belgium, Cuba, Sweden and Norway, and France. Our exports to Belgium had a value of \$5,778,000. Cuba purchased to the extent of \$5,000,000. The shipments to Sweden and Norway were valued at \$4,419,000, and those to France at \$2,512,000.

Other countries that bought over \$1,000,000 worth of American meat products were the following: Denmark, \$1,997,000; Canada, \$1,994,000; Brazil, \$1,354,000; the British West Indies, \$1,332,000; and British South Africa, \$1,033,000.

LIVE ANIMALS.

The live-stock export trade of the United States during 1901 amounted in value to \$52,000,000. The United Kingdom furnished the principal foreign market, taking shipments worth \$40,000,000. Among the other destinations of this trade, British South Africa, Cuba, and Canada were the most important. To British South Africa we sent live animals worth \$5,909,000. Cuba received consignments valued at \$2,080,000, while our exports to Canada had a value of \$1,777,000.

TOBACCO.

Tobacco in its various unmanufactured forms was exported during 1901 to the value of \$28,000,000. The United Kingdom, Italy, Germany, and France made the largest purchases. To the United Kingdom we sent shipments valued at \$8,821,000. Italy furnished a market for consignments worth \$4,458,000. Our exports to Germany were valued at \$3,914,000, and our exports to France at \$3,063,000. Among other countries of destination, those receiving the largest shipments were Belgium, the Netherlands, and Canada. The exports to these countries were valued as follows: Belgium, \$1,707,000; the Netherlands, \$1,567,000; and Canada, \$1,020,000.

VEGETABLE OILS.

The vegetable oils exported from the United States in 1901 had a value of \$19,000,000. Among the various foreign markets to which

shipments were sent, the Netherlands, France, and the United Kingdom ranked foremost. The Netherlands made purchases to the amount of \$4,118,000, France to the amount of \$3,398,000, and the United Kingdom to the amount of \$2,064,000. Additional destinations of leading importance were Belgium, Germany, Italy, and Austria-Hungary. Our exports to Belgium were worth \$1,730,000, and our exports to Germany, \$1,687,000. Italy and Austria-Hungary each received shipments to the value of \$1,369,000.

OIL CAKE AND OIL-CAKE MEAL.

Of oil cake and oil-cake meal the United States sent abroad in 1901 shipments having a value of nearly \$19,000,000. Germany and the United Kingdom afforded the principal markets. Our exports to Germany were worth \$5,286,000, and our exports to the United Kingdom, \$4,461,000. Extensive shipments were also made to the Netherlands, that country taking consignments valued at \$3,037,000. Of the remaining destinations to which we exported oil cake and oil-cake meal in 1901, Denmark and Belgium were the most important. To Denmark there were shipments worth \$2,775,000, while our exports to Belgium had a value of \$2,335,000.

FRUITS AND NUTS.

In our agricultural export trade for 1901, fruits and nuts formed an item of nearly \$11,000,000. Shipments of these products went to a large number of destinations, the most important among which were the United Kingdom, Germany, and Canada. The United Kingdom made purchases to the extent of \$4,606,000. To Germany we sold \$1,717,000 worth and to Canada \$1,648,000 worth. Of the remaining countries of destination, those receiving the largest shipments were the Netherlands, British Australasia, Belgium, British South Africa, France, Cuba, and Mexico.

DAIRY PRODUCTS.

Dairy products worth \$9,404,000 were exported from the United States during 1901. The principal part of these exports went to the British market, where consignments valued at \$6,914,000 were received. Next to the United Kingdom, Cuba was the destination of the largest shipments, our sales to that island amounting to \$456,000. Other countries that bought dairy products from the United States in considerable quantities were Canada, Brazil, the British West Indies, the Chinese Empire, Japan, and Mexico.

SEEDS.

Of seeds the United States exported during 1901 \$6,385,000 worth. The bulk of the trade was distributed among four countries—the Netherlands, the United Kingdom, Germany, and Canada. To the Netherlands we sent shipments worth \$1,633,000. The United

Kingdom made purchases to the extent of \$1,534,000, and Germany to the extent of \$1,288,000. Our exports to Canada were valued at \$1,217,000. Among other foreign markets, Belgium and France stood foremost.

DISTRIBUTION OF AGRICULTURAL EXPORTS, IN DETAIL.

The tables presented on the following pages embrace all the agricultural exports of the United States for the fiscal years 1897-1901, showing in the case of each article the extent of the shipments sent to the several countries of destination. For convenience in classification the articles are divided into two groups, consisting, respectively, of animal matter and vegetable matter. The tables are arranged in two series, the first relating to the value and the second to the quantity of the articles exported. To facilitate comparison cross references are given from each table of values to the corresponding table of quantities, and vice versa. In some cases, however, values only are given, no returns being made as to quantity. An index to the articles covered by the tables is printed on pages 199-202. The tables are as follows:

Value of the agricultural exports of the United States (animal matter), by articles and countries, during the five fiscal years 1897-1901.
